

## Spring 1 2026 - Foundation Stage Curriculum Newsletter

Dear Parents/Carers,

Here is an overview of what your child will be learning this half term across the different areas of learning. Our topic for the first half of the Spring term is called 'I wonder what moves?' The topics we choose are led by the children's interests and usually encompass several areas of learning. For this reason, the topics may change to reflect the direction the children wish to take their learning. Each week we will be taking on a different transport theme using the following books to introduce our focus vehicle/service.

In our Literacy we will be continuing to teach letters and sounds, targeting each of the phonics groups with the letters and sounds they need support with. Throughout each lesson children will continue to recap sounds and learn a new sound, practise blending letter sounds for reading and identifying sounds in words for writing. We will encourage the learning of tricky words which cannot be sounded out e.g. the, was, go. Also, we will be encouraging the continued recognition for reading and writing of the decodable high frequency words. We will continue to practise our correct letter formation.

In maths, pupils will continue to develop their subitising skills for numbers within and beyond 5, and increasingly connect quantities to numerals. Begin to identify missing parts for numbers within 5.

Through our 'I wonder what moves?' topic we will be developing our Understanding of the World by observing our local environment and looking at simple maps and globes and Google Earth. We will be investigating forces at work such as 'pushes and pulls' when looking at vehicles and using ramps with toy cars. We will be disassembling and assembling an old bike using tools. Also, we will be learning about old and new transport including cars, bicycles and trains.

We will continue to have a weekly circle time to encourage the children to talk about their thoughts and feelings as part of our Personal, Social and Emotional Development. This term our focus will be on how to become more confident as speakers and listeners and developing our ability to speak to others about our own wants, needs and opinions thinking about our own and others feelings. We will also learn about life skills, such as road safety.

In our Physical Development, during PE lessons, we will be experimenting with different ways of moving to improve control and coordination. We will be using small equipment as obstacles to develop our ability to negotiate space, such as when they are playing chasing games. Within the classroom we will continue to practise fine motor and pencil skills to support the children's ability to write and form their letters correctly. We will be using a variety of tools, objects and construction equipment to develop increasing physical control.

In Expressive Arts we will continue to build a repertoire of songs and dances, such as singing The Wheels on the Bus, The Runaway Train and The Yellow Submarine. We will explore vocal, body, instrumental and environmental sounds in our music lessons. We will continue to combine and manipulate different materials in learning activities such as painting, drawing and creating vehicles out of 'reclaimed materials.'

Please continue to support your child with listening to them read their books for 10 minutes every day and to read to them. Please continue to practise recognising and writing the letter sounds and tricky words in their pencil cases. You can also help with their maths by getting your child to say 1 more and 1 less to 10, finding out smaller parts of numbers to 10 and counting to 20.

Please check to Home School Books daily and use them to communicate with us or email us on

We will respond to emails as soon as we can. If you have any questions or need any support or advice please ask.

We look forward to continuing to work with you and your child.

Thank you for all your support so far this year.

The Foundation Stage Team
