

Morris Class

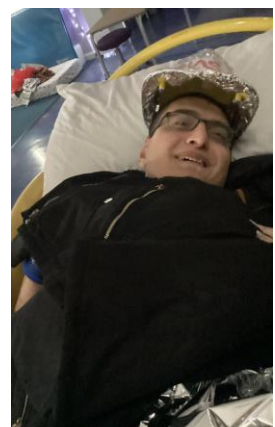

Class Welcome

We have had an exciting and busy term in Morris class, enjoying our topic Space and making the most of the occasional sunny weather outside. We have continued to make fantastic progress with our physio and physical development as well as improving our communication and expressing ourselves. We are all looking forward to our end of year celebrations!

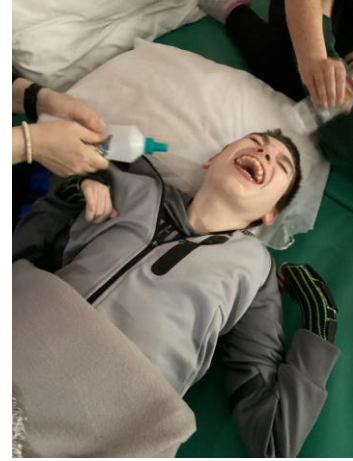

Communication and Interaction

In our communication lessons this term we have focused on Space, and studied 3 different sensory stories, 'You might be an alien if' 'Out of this world' and 'Here we are'. Everyone has really enjoyed exploring all the alien related items including slimy legs and arms, taking a journey on a rocket and gazing at the stars. We have also focused on our communication skills through Tacpac, working with the same member of staff to build our relationships and communication bonds.

Cognition and Learning

In our cognition and learning sessions this term we have looked at colours and numbers, still within the theme of Space. We have looked at coloured rockets, space sounds and counting down to take off! We have also made different coloured and textured planets.

Independence, Social and Emotional Development

We have continued to enjoy our community visits to local venues, including the local shops and the salvation army, where we have built some special and long lasting relationships. It is a huge achievement that we are all so kindly welcomed and considered when we arrive at the church. We have also worked on our personal and peer relationships in class through our physio programmes and intensive interaction.

Physical and Sensory

Morris class have enjoyed exploring their physiotherapy programmes and enjoyed spending time in other areas of the school such as the hall for choir, the playground with our peers and the sensory room. Everyone has worked hard to explore new and challenging physio positions this term and we are all very proud of ourselves and our peers.

Special News and Upcoming Events

This term we have been very lucky to have hosted our special guests Electric Umbrella Music Machine! We all got to join a workshop and then be part of their live broadcast to other SEND schools across the UK. We also celebrated Earth Day.
