

TOGETHER, WE'VE ACHIEVED SO MUCH!

25/26

Class 1&2

This year, we have worked hard, learning lots of new skills both in and out of the classroom. We have worked on friendships and working together, rights and justice as well as democracy; this has been one of our favourite areas and led to lots of discussion and research. We have furthered our knowledge in maths and conquered telling time as well as using money, and some of us even algebra.

We have been on a number of visits around our local area, (farms, parks, beaches and woods) and a little further afield, (botanic gardens and museums). We even got the chance to visit real reindeer at Christmas.

We have gained lots of experiences that we can carry forward which have extended our enjoyment and knowledge and we are looking forward to new challenges next year.

Class 3

We have enjoyed lots of visits during outdoor education to places such as Souter Lighthouse, Mount Grace Priory, Brimham Rocks and Fountains Abbey. We have found a new favourite playpark in Stockton's new urban riverside area, we enjoyed it so much we had to visit again just to make sure! We have also enjoyed our volunteering visits to help out Bev on her farm in Greatham and have developed great skills in Racketball and squash during our coaching sessions at Norton Squash club as part of our PE curriculum.

Class 4

Physical activities and outdoor experiences have been the mainstay of Class 4's summer term experiences. Boxing ability and agility has been finely tuned and we have some accomplished, disciplined boxers in the group. Summer assessments have been carried out with most students completing a range of assessments towards their grades. We have also begun to enjoy the produce from our onsite pod, tomatoes, strawberries, potatoes and Hartlepool's biggest cucumber!

Class 5

Class five have been developing their map reading and navigation skills as they prepare for their upcoming expedition. From interpreting map symbols and grid references to using a compass and planning routes, these practical skills build confidence, resilience, and independence. It's fantastic to see students embracing the challenge and making great progress as they work towards their Duke of Edinburgh Award.

Upper 1

Year 10 have continued to make excellent progress this term, working hard to develop their skills and understanding in Maths, Science and English. They have shown dedication, resilience, and a positive attitude towards their learning, building confidence as they prepare for their exams next year. We are proud of their achievements so far and look forward to seeing them continue to succeed in Year 11.

Resilience

Keep trying, even when it's tough!

Kindness

Be caring and helpful to others!

Growth Mindset

Believe you can improve and learn!

Personal Responsibility

Make good choices and own your actions!
