Dear Parent/ Carer

## **Height and weight checks for children in Reception and Year 6**

Every year in England, school children in reception and year 6 have their height and weight checked at school as part of the National Child Measurement Programme. Height and weight measurements are used to calculate weight status. We collect this information to build a picture of how children are growing to help plan better health and leisure services for families. In most areas, parents receive their child's measurement data as this can be useful information about their child's growth and provides an opportunity to offer support to parents where required. Your child's class will take part in this year's programme.

The checks are carried out by the Blackpool School Nursing Team. Children are measured fully clothed, except for their coats and shoes, in a private space away from other pupils. The programme will be delivered in a safe way, in line with the school and local authority's safety control measures and national guidance for schools and healthcare.

## **Maintaining the well-being of children in the NCMP**

The wellbeing of children and families is very important. Measurements are conducted in a sensitive way, in private and away from other children. Individual results are not shared with your child or their school. The weight and height information is shared only with you via a parent feedback letter and/or telephone call. It is your choice to share or not share the information with your child.

The emotional impact of the NCMP has been researched and studies show that body image, self-esteem, weight-related teasing and restrictive eating behaviours do not change as a result of being measured or receiving feedback. If you are concerned about your child's growth, weight, body image or eating patterns, seek further support from a school nurse or GP.

## **The information we collect and what it is used for is listed below:**

- your child's date of measurement, sex and date of birth are used to calculate your child's weight category.
- your child's name, date of birth and NHS Number are used to link your child's measurements in Reception and Year 6. Other data sets held by NHS England and Department of Health and Social Care, may also be linked to allow the addition of information from health and education records, where lawful to do so, to understand how and why the weight of children is changing, and how this affects children's health and education and how the care children receive can be improved.

Caring • Safe • Respectful

Acting Chair: James Wilkie  
Interim Chief Executive: Maggie Oldham

**RESEARCH MATTERS AND SAVES LIVES – TODAY'S RESEARCH IS TOMORROW'S CARE**  
Blackpool Teaching Hospitals is a Centre of Clinical and Research Excellence providing quality up to date care. We are actively involved in undertaking research to improve treatment of our patients. A member of the healthcare team may discuss current clinical trials with you.

This includes your child's health data relating to:

- Their birth, hospital care (including time in hospital and out-patient appointments and diagnosis of medical conditions)
- Mental health
- Social care
- Primary care - includes all healthcare outside of hospital such as GP and dental appointments,
- Public health - including data relating to preventing ill health such as immunisation records
- Records for when and the reason why people pass away
- Medical conditions such as cancer, diabetes
- Health, lifestyle and wellbeing surveys that your child has participated in
- Your child's ethnicity and address are used to help understand some of the reasons for the difference and changes in child weight across England
- Your address is required to send you your child's feedback letter. This will include your child's measurements together with information about healthy eating, being active and related activities available in your area.
- Your email address and telephone number are required as we may contact you by email or telephone to discuss your child's height and weight measurement.
- This year you will also be sent a link from school from Cinnamon Digital where you can also access the information contained in this letter.

**All the data collected is also used for improving health, care and services through research and planning.**

**All this information is treated confidentially and held securely. No individual measurements will be given to school staff or other children.**

### **How the data is used**

We will store your child's information as part of their local child health record on the NHS's child health information database and share it with their GP.

All the information collected about your child will be sent by us to NHS England. NHS England is responsible for collecting data and information about health and care so that this can be used to monitor and improve the care provided to people across England.

The information collected about your child will also be shared by NHS England with the Office for Health Improvement and Disparities (OHID) which is part of the Department of Health and Social Care (DHSC) but in a de-personalised form only. This means OHID will not be able to identify your child. OHID focuses on improving the nation's health so that everyone can expect to live more of life in good health, and on levelling up health disparities to break the link between background and prospects for a healthy life.

Both NHS England and the Office for Health Improvement and Disparities (DHSC) will use the information from the National Child Measurement Programme to better understand numbers and trends in child weight and body mass index (BMI). This helps with the planning of services to support healthy lifestyles in your area. No information will ever be published by NHS England or the Office for Health Improvement and Disparities (DHSC) that identifies your child. NHS England use the data to produce [National Child Measurement Programme statistics reports](#) showing trends at national and local community level.

De-personalised information from the National Child Measurement Programme may also be shared by NHS England with other organisations, such as universities. This is to help improve health, care and services through research and planning. This information cannot be used to identify your child, and NHS England only ever shares information for research through formal assurance and approvals processes, seeking advice from experts as necessary.

### **Withdrawing your child from the National Child Measurement Programme**

If you are happy for your child to be measured, you do not need to do anything -  
If you do not want your child's height and weight to be checked, or your child has a medical condition that affects their height or weight please let us know as soon as possible by using the contact details provided below:

Blackpool School Nursing Team:  
01253 951740

**Please note your child will not be made to take part on the day, if they do not want to.**

Your Sincerely,

Lisa Lonsdale  
Head of Children's Community Services.
