

Week 14: Video Support for the Learning Project - Space	
EYFS	<p>Measures : This video will support parents by exploring some of the language associated with measures. The video will define the following words: shorter, taller and longer, as well as exploring what this looks like. This video might be useful in supporting the activities listed on Monday, Tuesday and Thursday in this week's learning project. Click here to access the video.</p>
KS1	<p>Length: This video will support parents by exploring what length is. It will also show how children could approach ordering things that are different lengths and shows how they can measure length using a ruler. This video might be useful in supporting the activity listed on Monday in this week's learning project. Click here to access the video.</p> <p>Height and Length: This video will support parents by exploring what height is. It will also show how children could approach measuring the height of things. This video might be useful in supporting the activities listed on Tuesday and Thursday in this week's learning project. Click here to access the video.</p>
LKS2	<p>Perimeter: This video will support children and parents by explaining what the perimeter is. It will also show you how to find the perimeter of different 2D shapes by counting squares and measuring the sides. Also, the video will explore how to find the perimeter of some compound shapes. The video will support the activities listed on Monday, Tuesday and Wednesday in this week's learning project. Click here to access this video.</p> <p>Area: This video will support children and parents by explaining what the area is. It will also show you how to find the area of rectangles and squares by counting squares and through using calculations. Within the video it shows how you might be able to make irregular shapes into squares/rectangles to help find the area. The video will support the activities listed on Monday, Tuesday and Wednesday in this week's learning project. Click here to access this video.</p>
UKS2	<p>Perimeter: This video will support children and parents explaining what the perimeter is. It will also show you how the perimeter of rectangles and some compound shapes can be found. The video will support the activities listed on Monday, Tuesday and Wednesday in this week's learning project. Click here to access this video.</p> <p>Area of a rectangle: This video will support children and parents explaining what the area is. It will also show you how to find the area of rectangles and some compound shapes. In the video, it will also show how to draw a shape when the area is given or finding the value of missing sides. The video will support the activities listed on Monday, Tuesday and Wednesday in this week's learning project. Click here to access this video.</p> <p>Area of a triangle: This video will support children and parents explaining how to find the area of different types of triangles. It will build on knowledge children might have about how to calculate and find the area for squares and rectangles. The video will support the activities listed on Tuesday and Wednesday in this week's learning project. Click here to access this video.</p>
