

Week 8 Video Support for the Learning Project - Under the Sea	
EYFS	<p>Repeated Patterns: This video might support parents with understanding what repeated patterns are and also shows some of the different ways they can approach activities that are listed in the Learning Projects on Tuesday, Wednesday and Friday. Click here to access this video.</p>
Years 1 and 2	<p>Reading time up to the nearest 5 minutes: This video will provide support and ideas for parents on how they could approach teaching the time to the nearest 5 minutes with their children. It also looks at telling time on the hour (o'clock), half past and quarter past and discusses how a clock works. This will help with Thursday's activity in the learning projects for this week. Click here to access this video.</p> <p>Making your own clock: In this short video children or parents are shown how you can make an analogue clock using paper, pens and some drinking straws. Click here to access this video.</p>
Years 3 and 4	<p>Reading time to the nearest minute: This video will provide ideas and support for parents on how they could approach teaching the time to the nearest minute with their children. It also looks at telling time using the terms past and too. For children watching this video it will show examples of reading time to the nearest minute which will help them. This might help support activities from Monday to Wednesday in this week's learning project. Click here to access this video.</p> <p>Converting time from analogue to digital: This video will provide ideas and support for parents or children on how they could approach teaching children how to write time from an analogue clock in a digital format. It also looks at AM and PM and how to write digital time on a 12 hour digital clock and a 24 hour digital clock. This video will support the activity given on Monday of this week's learning project. Click here to access this video. Click here to access this video.</p> <p>Seconds in a minute and minutes in an hour: In this video it shows children how many seconds are in a minute and how many minutes in an hour. Children or parents could use this to support them with the activity given on Tuesday of the learning projects. Click here to access this video.</p> <p>Making your own clock: In this short video children or parents are shown how you can make an analogue clock using paper, pens and some drinking straws. Click here to access this video.</p>
Years 5 and 6	<p>Reading Timetables: This video will help children or support parents in helping their children on ways timetables can be read. It has been created to help children with activities given on Wednesday and Thursday of this week's learning project. Click here to access this video.</p>
