

## Our Mission

**Haymerle School is a safe learning environment where everyone**

has high expectations and celebrates achievement

can develop lifelong learning skills

respects themselves, each other and the world around them

At Haymerle School we have the right to expect:

- that there are effective channels of communication;
- that the individual talents of others (staff, pupils, parents/carers, governors and members of the community) are recognised and celebrated in the life of the school;
- that individuals share their knowledge, skills and experience for the benefit of others;
- that the curriculum reflects the principle of empowerment;
- that there is a consistent approach to teaching and learning within which there is evidence of the school's mission statement and aims;
- that there will be a secure learning environment in which individuals will feel able to ask for help and to offer support, in the achievement of the curriculum;
- that meetings and decision making processes are characterised by a shared commitment to the vision of the school and recognition that this is best achieved through a process based on shared knowledge, co-operation and trust;
- that empowerment means partnership between staff, staff and parent(s)/carer(s) and that parent(s)/carer(s) are involved in developing ways in which they might constructively engage in the education of their children.

### Aims

- to establish an agreed range of practice in respect of teaching and learning specifically the use of TEACCH, PEC's, Attention Autism, Intensive Interaction, Let's Make a Deal and Makaton across the school.
- to enable staff to identify aspects of practice which they wish to develop and in which they would welcome support or share expertise in;
- to improve the quality of learning experiences offered to pupils;

- to provide an agreed focus for monitoring the curriculum.

The policy seeks to:

- meet the needs of pupils more effectively by offering approaches to teaching and learning and the usage of resources which are consistent across the school;
- to secure consistency of practice and learning experience for all pupils across the school
- meet the needs of staff by offering appropriate developmental opportunities;
- meet the need to retain the best features of educational practice when seeking to implement the National Curriculum

### **Curriculum Intent Statement**

At Haymerle School we are committed to providing a differentiated curriculum with breadth that allows all our pupils to be able to:-

Secure development and achievement on their individual learning pathways

- pre-formal
- semi-formal
- formal

Have opportunities to [embed their learning through a thematic, creative curriculum](#).

Have opportunities to [secure their engagement, enjoyment, build independence](#), and promote their spiritual, social, moral, cultural, mental and physical development as they move to the next stage in their education.

Have opportunities to [revisit and secure skills](#) in knowledge and understanding of the world, creative arts and Personal, Physical and Social Development [through the 2-year rolling programme](#).

Promote active [community involvement](#) through use of the local facilities, working with external agencies and groups and [celebrating key events throughout the year](#).

### **Policy in Action**

When planning around programmes of study and agreed schemes of work, staff will refer to the statements within this policy to ensure that the characteristics of teaching and learning we have agreed upon are reflected in action in the school.

The key characteristics of teaching and learning at Haymerle School are:

- Pupils are learning and making progress
- Pupils are engaged and motivated to learn
- All staff have high expectations of pupils learning and progress (appropriate to each pupils individual abilities)
- Staff skill and expertise
- Consistency of practice and standards in classrooms and across the whole school environment
- ASC appropriate learning environment.
- Use of outside area of the school.
- Use of the locality and beyond.
- Positive engagement with parents, carers and supporting agencies

### **MONITORING, FEEDBACK AND SUPPORT**

In order to ensure that the Teaching and Learning Policy impacts on children's learning in all areas of school life, we believe it is important that we monitor pupils learning.

The purpose of monitoring procedures is to establish a common professional dialogue amongst staff within which individual needs are recognised and supported.

In all monitoring, the impact of our teaching on the learning of the children is of prime consideration. We promote good and consistent practice through a rolling programme including

Mid term / Weekly planning share, up to date pupil portfolios, pupil progress evidence review (EFL), learning environment monitors, learning walks, peer observations, lesson observations/ monitoring of pupils learning on which key areas are identified.

Supportive, purposeful focused feedback from monitoring is an essential part of the process. The purpose of feedback and support is to assist professional development and ensure pupils receive appropriate and outstanding learning opportunities.

Staff will act in line with training support and feedback to develop and improve their teaching practice.

Issues relating to safeguarding, health and safety will be acted on immediately.

## **Teaching And Learning for Pupils with Autistic Spectrum Disorders at Haymerle School**

Autism is a life long developmental disability that affects social and communication skills. Children with autism often have accompanying learning disabilities but, whatever their general level of ability; they will share a common difficulty in making sense of the social expectations and environment around them.

Majority of children with ASD will have some degree of moderate to severe learning difficulties, and up to half may not learn to use spoken language, many children will have normal or occasionally exceptional ability and may use spoken language at an apparently sophisticated level.

### **The Triad of Impairments**

One of the key signs which usually emerge in the first few years of life is the triad of impairments in the areas of:

- Social interaction
- Social communication skills
- Imagination

**also**

Individuals with ASC often experience **sensory processing difficulties** which impact in their capacity to engage successfully with their learning and the world around them. Staff working at Haymerle will be aware of the potential barriers to learning this causes and work in collaboration with school therapy teams and with parents to develop strategies to assist pupils manage any sensory needs.

These impairments are often accompanied by limited, narrow repetitive patterns of behaviour and interests and sometimes challenging behaviour.

Other children may have one or more impairments in these areas, children with ASD will have impairments in all areas.

### **Appropriate Strategies for Learning and teaching for pupils with Social Communication Disorders including ASD**

At Haymerle School we provide a **structured teaching approach** to support pupils with social communication disorders and autistic spectrum disorders.

#### **At Haymerle School we aim to**

- maximise a child's potential through improving skills,
- adapt the environment to be more conducive to learning
- provide opportunities for generalising skills to other situations and building independence.
- build upon the strengths and interests of each child

The general principles of **structured teaching** apply to children with ASD, however the key to its effectiveness is the use of these principles based on individual needs and skills of each child.

For example: all students with ASD will benefit from having a daily schedule - *the way this schedule is set up, organised and implemented is based on individual skills and needs.*

### **Expectation for Structured Teaching (TEACCH) at Haymerle School**

Providing structure for pupils with ASD helps them to organise themselves and respond more appropriately to their environment.

**‘The foundation for Structured Teaching is that visual information is more easily processed and preferred by people with Autism than verbal information’**

Structured Teaching is a strategy developed to teach pupils with ASD in the classroom setting. Based on the needs, skills, and deficits of ASD, it is a system for

- organising the classroom,
- developing appropriate activities,
- helping pupils to understand the school environment
- helping pupils to engage effectively and successfully within this.

#### **▪ Physical Structure (School and Classroom Organisation)**

The organisation of the classroom including where materials and furniture are placed can help a child to focus on details and give cues to their purpose. This requires clearly defined spaces and areas, such as a work area and a play area, quiet areas and a neutral transition area for a change of activity to go to, such as a table or notice board, to get more information about what is coming next.

#### **▪ Individual Timetable (Schedule)**

The aim is actually to teach flexibility through a visual structure which is concrete. The visual timetable represents what activities will be happening that day, in which order and will include a finish place. The system needs to be meaningful for the child so they can manipulate the timetable at each change of activity in some way. The timetable may read from top to bottom, or left to right, depending on the individual child as will the choice of objects, pictures, words or symbols.

#### **▪ Work Systems (How much work do I need to Do?)**

The work system clearly shows the child what work needs to be done, including the amount, when it will be finished and what to do next. There will also be a finish place. The system may be of different types from simple inset puzzles through to matching colours, numbers or written instructions.

#### **▪ Visual Structures in a task/ activity**

This is the method of incorporating visual clues into the task itself therefore the child does not need to rely on the teacher’s verbal or physical prompts in order to understand the task. Visual structures increase the child’s ability to work independently without interaction or intervention by the teacher. There are three

basic types of visual structure: visual organisation, visual clarity and visual instructions.

- i) **Visual Organisation** – controls the situation by organising the materials and the space of the working environment. For example placing materials in distinct containers and creating physical and visual boundaries to limit the size of the work area.
- ii) **Visual Clarity** – highlights the key materials and relevant concepts emphasising important parts of the visual instructions. The child is prompted to focus on the significant details of the task when these details are highlighted through colours, pictures, numbers or words. At the most concrete level, visual clarity is achieved through limiting the materials to only what is needed to complete the task.
- iii) **Visual Instructions** – show the student how to combine and organise a series of elements to obtain the desired outcome, they give the child a necessary information to put the parts or details of a task together in a systematic and meaningful way. Once a child has learnt to look for and follow visual instructions, he will be able to use this to complete more complicated tasks independently. There are different types of visual instructions ranging from the most concrete level through to written instructions.
- iv) **Concept of Finish**  
To reduce feelings of anxiety, the child with ASD will feel more in control if he understands how long an activity will last and when it is finished.

#### **Supporting Communication using PECS at Haymerle School**

**(Please read the schools *Communication Policy* for more detailed guidance regarding policy, procedure and expectations in communication support and development)**

We use appropriate augmentative communication strategies to promote and engender communication skills with our pupils. Where pupils are not able to access PECS we will use Makaton and intensive interaction strategies to facilitate engagement, turn taking, eye contact and tolerance of other people. Where a pupils communication is more advanced we will use speech.

The majority of the pupils at Haymerle School have PECS recommended on their EHCP's and PECS forms the central communication system in use across the school.

The PECS (Picture Exchange Communication System) developed by Lori Bondy and Andrew Frost, gives children a means of communicating within a social context. Children using PECS are taught to approach and give an object of reference/picture/symbol of a desired item to a communicative partner in exchange for that item.

By doing so the child initiates a communicative act for a concrete outcome within a social context. From the beginning the child learns to initiate communicative exchanges rather than respond to prompts.

### **Attention Autism:**

### **Good Practice at Haymerle School:**

#### **Why do we use the 'Attention Autism' approach at Haymerle?**

**Simple answer – to promote pupils engagement, enjoyment and shared attention**

Attention Autism originates from the idea that successful communication is dynamic, engaging and joyful. We learn best when we work with enthusiasm, motivation and creativity.

**We remember good times and shared experiences.**

The Attention Autism approach provides the child with an experience worth communicating about. (Attention Autism is an intervention created by **Gina Davies**. Haymerle staff have adopted the framework, principles and ideas to best meet needs of Haymerle pupils.)

Pupils with ASD often have difficulties with their attention skills. People need to have developed attention and listening skills in order to understand and use language. Attention Autism strategies can help us start at the attention level pupils are at and help them to build upon it. The 4 stages of the attention autism approach help children at different levels.

**Stage 1- The Bucket:** Everyone attends to the same thing chosen by the adult

**Stage 2- Attention Builder:** Pupils develop longer and sustained attention skills.

**Stage 3- Turn-taking games:** Pupil learn to shift attention

**Stage 4- Independent work:** Pupils focus, sustain, shift attention, transition and then refocus.

**How it links to the curriculum?** At Haymerle we use attention autism techniques to help improve:

- Concentration
- Story telling
- Independent working
- Art
- Commenting skills
- Understand scientific ideas
- Counting
- Anticipation
- Learn new vocabulary
- Work and play with our friends

#### **In Attention Autism Sessions**

## **Lead Staff**

- Remember the bucket belongs to you and only you!
- Be the most interesting and amazing thing in the room
- Use simple relevant language
- **Teach! Don't test!**
- Practise first
- **Have fun!**

## **Supporting adult/s**

- **If you are in the room then you participate.**
- You do not leave your seat. (It gives a message to the children that they have permission to leave too!)
- You do not record anything.
  - You don't ask questions or communicate with the lead person or other staff members.
- **You model how to sit and look at the bucket as if it is the most exciting thing you have ever seen.**
  - Aim to prevent a child from touching without speaking

## **Additional Therapy / Working in Partnership**

Teachers and support staff will consider how to use available therapy (OT, Music, Rebound and SALT) integrated into each pupils daily routine to support and enhance their learning.

Staff work collaboratively with therapists and in house staff teams to access appropriate resources and activities to fully support and extend an individual pupils learning opportunities.

SALT and OT programs will be discussed with the staff team, therapists will work with staff teams to support their skills and understanding of a child's therapy needs and staff teams will include targets and activities into each child's daily schedule.

**To be reviewed annually or as needed within each academic year**

**Next Review September 2026**

**Pupil Learning**  
**Children Learn Best When....**

<b><u>Policy Statement</u></b>	<b><u>Policy in Action</u></b>	<b><u>Strategies for Action</u></b>

**An effective teacher...**

<b><u>Policy Statement</u></b>	<b><u>Policy in Action</u></b>	<b><u>Strategies in Action</u></b>
...demonstrates that planning is informed by prior knowledge of the children skills and progress and endeavours to encompass the holistic needs of the child.	Groupings are based on specific, as well as ongoing, teacher assessment/assessment by omission.  IEPs planned with child's strengths as a starting point.  Tasks appropriate to pupils level of ability – and sufficiently challenging to facilitate pupil progress/ learning.  Pupils make progress	Annual reviews are comprehensive and realistic documents that reflect the years work and achievements for each pupil with clear targets for the future.  IEP attainment monitored each term for pupil progress and appropriateness.  Pupil progress in core subjects monitored termly

**The Learning Environment**  
**Classroom and School Organisation**

<b><u>Policy Statement</u></b>	<b><u>Policy in Action</u></b>	<b><u>Strategies for Action</u></b>
<b>Organisation</b>  <b>Classrooms organised to facilitate use of TEACCH system.</b>	<p>Designated areas within classrooms</p> <p>Carpet area, Group tables, Workstations,</p> <p>Visual prompts in place prior to pupils entering classrooms (schedules, work schedules, other visual support – LMAD, Help and Wait)</p> <p>Rooms are tidy and systems in place to ensure pupils distraction minimised as far as possible</p> <p>Children developing increasing independence within the classroom / school environment.</p>	<p>Classroom Management Policy in place.</p> <p>Classroom Management observations carried out by SMT feedback to staff</p>
<b>Furniture</b> <b>Will be of high quality and well maintained, appropriate to the needs of the children.</b>	<p>Furniture age appropriate as children move up through the school.</p> <p>Regular checks made on furniture by staff to ensure safety.</p>	<p>Realistic sum from the school's budget is allocated to furniture purchases each year.</p>
<b>Display and General Appearance of the Room</b>  <b>Displays will be stimulating, relevant, tactile and interactive, reflecting recent work, covering a range of curriculum areas and reflecting differing cultures.</b>	<p>Displays reflect current topics in class.</p> <p>Pupils work celebrated in the classroom through display</p> <p>Staff ensure that display support learning and is not distracting pupils from learning (nb Autistic Spectrum Disorder pupils and social communication disorders)</p>	<p>Please read school policy on displays – where roles and responsibilities outlined clearly.</p>

<b><u>Policy Statement</u></b>	<b><u>Policy in Action</u></b>	<b><u>Strategies for Action</u></b>
<b>The value put on children's work by teachers in the school will be reflected in the quality of displays and evidence of the children's work and involvement.</b>	Displays will engage the onlooker: - ask questions - invite interaction - not always 2D clearly presented, use of IT, cutters, good quality backing paper provided. Displays will be updated regularly (Termly)	Written policy on displays with clear responsibilities outlined within it.  Keep photo evidence of good displays
<b>All planning for displays will take into account the school's policy on equal opportunities.</b>	Where possible/appropriate captions are written in different languages.  Festivals from a variety of cultures are represented in displays.	Bilingual texts are available from the ELS.  Headteacher organises displays around relevant festivals for assemblies.
<b>Resources All resources available (commercially produced/child/staff produced) will be of high quality, matching curriculum needs and reflecting equal opportunities.  Storage systems for resources will promote independence, autonomy and encourage careful use and tidiness.</b>	Storage systems / schedules, work systems in place to support access to most resources i.e. labelled trolleys.  Rooms kept tidy and clutter free to reduce pupil distractions and ensure calm and organised classroom environment  Curriculum resources to be stored tidily with clear labels linked to curriculum map and topics.  Subject managers to ensure that resources are appropriate to support colleagues delivery of the subject.  Staff respect the school environment and ensure resources are used carefully and returned tidily to storage area. Loss and breakage reported to subject managers.	Children will be trained in the care of resources and storage.  Storage furniture is consistent within classrooms.  Health and Safety Policy in place to ensure appropriate use of resources.  Risk Assessment in place to ensure resources used safely and appropriately.  Systems in place to report concerns about resources, furniture, school environment.

## The School Environment

<b><u>Policy Statement</u></b>	<b><u>Policy in Action</u></b>	<b><u>Strategies for Action</u></b>
<p>The school staff will be active in providing valuable and relevant outside play experiences.</p> <p>Adults will provide good role models as well as responding to spontaneous play situations, paying particular attention to promoting equal access for boys and girls.</p>	<p><b>Adults on duty at playtime and lunchtime take on an active role.</b></p> <p>All staff aware of school expectations with regard to the outside area.</p> <p>All staff team to be present in supporting pupils to and from play areas, lunch and transitions from and to the bus.</p> <p>Play areas, Science and Nature garden, <b>included in planning</b> to provide pupils with opportunities to extend learning and skills beyond the classroom.</p>	<p>Regular monitoring and reviewing to ensure equitable use of resources.</p> <p>Staff to support pupils by provision of games and activities.</p> <p>Risk Assessments to be completed for outings and off site education</p>
<p>Outside area is developed to provide opportunities for play within a variety of spaces i.e. quiet places, active places, noisy, places.</p>	<p>Children are included in establishing school rules which extend into the playground.</p>	<p>Rules are reviewed with the children on a regular basis.</p>
<p>The curriculum on offer inside the classroom will, wherever possible, be available outside, with appropriate resources provided.</p>	<p>Appropriate use of outside area built into half termly plans. (e.g. wildlife garden)</p> <p>e.g. Litter Surveys Growing Things Shadows 3D Artwork Observation of mini beasts.</p>	<p>Use of extended school environment evident on plans and integrated to promote</p>

### The Locality and Beyond

<b><u>Policy Statement</u></b>	<b><u>Policy in Action</u></b>	<b><u>Strategies for Action</u></b>
<b>We value the local area and community as a resource for topic work and visits are planned to fit in with half termly work.</b>	<p>Teachers plan visits and complete Risk Assessment</p> <p>Opportunities to extend learning to the local community and to support generalising skills to a range of learning environments.</p> <p>Link with facilities in the local environment to facilitate the use of symbols to support communication on outings and to facilitate skill generalisation.</p>	<p>Visits and outings support planned learning activities and support pupils engagement with the terms topic</p> <p>Risk assessments completed with learning outcomes included.</p>
<b>By extending our curriculum into the outside area of the school we aim to forge links with the local community, and so harness the skills of local people.</b>	<p>Information about local area resources will be kept as a resource.</p> <p>We are committed to using the various skills of parents/carers to support us in our work.</p>	<p>Register of parents/carers skills on information to be collected for use in future.</p>
<b>Whole School Commitment to broaden the children's experiences beyond their local environment.</b>	<p>Our children have the opportunity to see artefacts from other countries and cultures.</p> <p>Visits to a variety of educational / historical/ religious locations for field trips etc.</p>	<p>All visits out of school will be written into ½ - term plans.</p> <p>RA's to be completed with learning outcomes</p>
