

HEAP BRIDGE VILLAGE PRIMARY SCHOOL

SCIENCE KNOWLEDGE ORGANISER – YEAR 1: ANIMALS, INCLUDING HUMANS

Key Objectives:

- identify and name a variety of common animals including fish, amphibians, reptiles, birds and mammals
- identify and name a variety of common animals that are carnivores, herbivores and omnivores
- describe and compare the structure of a variety of common animals (fish, amphibians, reptiles, birds and mammals, including pets)
- identify, name, draw and label the basic parts of the human body and say which part of the body is associated with each sense.

Non-Statutory guidance:

Pupils should use the local environment throughout the year to explore and answer questions about animals in their habitat. They should understand how to take care of animals taken from their local environment and the need to return them safely after study. Pupils should become familiar with the common names of some fish, amphibians, reptiles, birds and mammals, including those that are kept as pets.

Pupils should have plenty of opportunities to learn the names of the main body parts (including head, neck, arms, elbows, legs, knees, face, ears, eyes, hair, mouth, teeth) through games, actions, songs and rhymes. Pupils might work scientifically by: using their observations to compare and contrast animals at first hand or through videos and photographs, describing how they identify and group them; grouping animals according to what they eat; and using their senses to compare different textures, sounds and smells.

Asking simple questions and recognising that they can be answered in different ways:

Observing closely, using simple equipment:

Performing simple tests:

Identifying and classifying:

Using their observations and ideas to suggest answers to questions:

Gathering and recording data to help in answering questions:
