

# Celebrations- Foundation Home Learning ideas

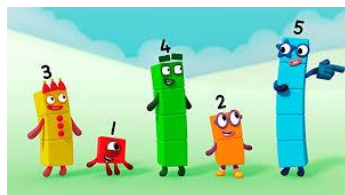

Share pictures of a celebration that has happened in your family.

Write an invitation to an imaginary party.  
Where will the party be? What date and time will it happen?

Do some research about another celebration that happens around the world. What is it called? Who celebrates it? When does it happen?

Create your own numberblocks. What colour are they? What special features do they have?

Make your own game where you can practice subitising using dice numbers.

Learn a new nursery rhyme and teach it to the rest of the class.

Make your own celebration banner or decorations.

Create some autumnal art using leaves or autumn colours.

Read about the Christmas story and why it is important to Christian people.

These are just ideas of where the children could take their learning but feel free to let their imagination run wild! We can't wait for them to share it in the classroom!
