

# Transport- Foundation Home Learning ideas

Share pictures of transport you have in your family. Who does it belong to? When do they use it?

Draw a map of your journey to school. Do you walk or drive? How long does it take you? What do you see on the way?

Design your own mode of transport. Does it have wheels? How fast does it go? This could be presented as a poster or you could make it using junk modelling.

Take a trip on a mode of transport and take pictures, draw or write about what you saw.

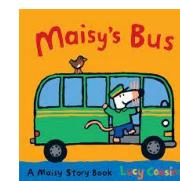

Find out some facts about a mode of transport and share them with the rest of the class.

Draw a picture/paint a picture of your favourite mode of transport.

Create a new line for the wheels on the bus or learn another song about transport.

Bring in a story to share with the rest of the class about transport.

These are just ideas of where the children could take their learning but feel free to let their imagination run wild! We can't wait for them to share it in the classroom!
