

Sustainability & Climate Update

Celebrating our progress since September

We are incredibly proud of the work that has taken place at High Green Primary School since September to strengthen sustainability, climate education and outdoor learning.

Following a recent meeting with Rob Catrall from Let's Go Zero, it was wonderful to hear how positive he was about the progress we have already made. He commented that our school is ahead of many others in Sheffield, a real credit to our pupils, staff, governors, volunteers and wider school community.

What we've been busy doing

Rewilding Award

Our amazing green spaces have been recognised through the award of the Rewilding Award, celebrating biodiversity and outdoor learning.

Forest School & Outdoor Learning

Forest School continues to develop across the school, making regular use of our woodland, secret garden and field to support outdoor learning, wellbeing and meaningful outdoor experiences.

Developing our School Allotment

Our allotment volunteers have worked tirelessly since September and have created seven raised beds – one for each class. Children will begin using the allotment this term.

Energy & Climate Action

We are reviewing our school buildings to improve energy efficiency and planning ahead for long-term sustainability improvements.

Pupil Leadership

Our Climate Ambassadors are actively involved in leading sustainability work across school.

Looking ahead

This term and beyond, we will:

- Begin using our allotment with all classes
- Continue to develop Forest School and outdoor learning
- Further enhance our woodland and green spaces
- Work towards long-term sustainability improvements

Together, we are building a greener, healthier future for our children.
