

# Have you or your child suffered from an Adverse Childhood Experience? (Also known as ACEs.)

*ACEs can include domestic violence, separation or divorce, mental health, abuse, neglect, a family member being in prison, drugs and/or alcohol problems.*

*Studies have shown that one or more ACEs can impact on a person's learning, behaviour, health and well-being.*

**If you or your child have been affected and would like to speak to someone in confidence, let a member of staff at Reception know that you wish to speak to someone about ACEs. All our staff are ACEs aware.**

***ACEs should not be anyone's destiny.***

***We're here to listen.***

***We're here to help.***
