### Art and Design Progression in EYFS

The table below outlines the most relevant statements taken from the Early Learning Goals in the EYFS statutory framework and the Development Matters age ranges for Three and Four-Year-Olds and Reception to match the programme of study for Art and Design.

The most relevant statements for Art and Design are taken from the following areas of learning:

- Physical Development
- Expressive Arts and Design

Knowledge in Art and Design should address awareness and use of artists' work, but also teach the use of language when speaking or writing about art. It should also cover terminology regarding processes, materials and techniques.

### Understanding Different Types of Knowledge in Art

#### **Substantive Knowledge**

Substantive knowledge is the subject specific content of art and design which is taught through research and practice. Substantive knowledge covers a range of topics including History of Art and modern Art Practice. Substantive knowledge can broadly be defined by art movements, knowledge of artists and artistic disciplines. The substantive knowledge of Art and Design is outlined in the National Curriculum.

#### **Disciplinary Knowledge**

The disciplinary knowledge of Art and Design incorporates the discrete artist skills and techniques (components) which are explicitly taught in reference to the principals of Art and Design. Disciplinary knowledge also refers to contextual studies of specific artists and artworks and the language of art in which we use to analyse and discuss Art and Design. Disciplinary knowledge is broken down into components which culminate together to create a composite outcome.

#### **Procedural knowledge**

Procedural knowledge is the understanding of how art is made. It is its journey from research, to ideas, to practise, making, presenting and evaluating. Procedural knowledge teaches children how to approach the learning of art and design and the stages they much go through in order to create an effective and informed creative artwork. Procedural knowledge is represented by the stages of 'visual literacy', 'generating ideas', 'create' and 'present'.
