

COULD YOU BENEFIT FROM A SUMMER SCHOOL?

A Summer School is a fantastic opportunity to gain the competitive edge, experience your future subject at degree level and see what life at university is like. Attending a Summer School can make a significant difference to your future success, particularly when applying for the most competitive universities.

Here at HNC students are encouraged to take a look at two prestigious schemes. The Sutton Trust offers over 40 subject placements from Archaeology and Anthropology to Veterinary Medicine at world-leading universities including Oxbridge. Applications are now open and further details can be obtained from Aspire Lead Scott Townshend (s.townshend@huddnewcoll.ac.uk)

We also provide comprehensive support for the prestigious STEM placements organised by the Nuffield Foundation. These give you a unique experience, and you could find yourself analysing big data, solving problems or programming a computer.

Students are invited to join a lunchtime information session on 11th or 13th February in the meeting room opposite the LRC. Email j.norton@huddnewcoll.ac.uk for further details.

COMING UP IN TUTORIAL

In tutorial we will be raising awareness around being a Young Carer, and the support available. Year 12 students will be exploring the Climate Change crisis, and what we can do to tackle this - don't forget to sign up to the HNC Green Pledge and sign up to help with our tree planting scheme!

Year 13 students will be looking at the topical issues around knife and gun crime, and the rise of 'County Lines.' Students will also look at how young people may become involved in this, and how the gangs operate.

 @huddnewcoll

STAY HEALTHY

There are lots of bugs at this time of year. Please help yourself to stay healthy by taking extra care with hand washing, covering your mouth when you cough and making sure you throw your tissues away when used. This really does make a difference.

HELP US PLANT THE HNC TREES

As part of our Green Agenda, we are planting over 300 trees around Campus in March.

Trees offset harmful emissions, and the Woodland Trust has provided the trees and we will be planting them with the support and help of the Colne Valley Tree Society.

This is phase 1 in our tree planting scheme, and our plans to become a more environmentally friendly College.

If you'd like to join our planting team, email Sarah Newton s.newton@huddnewcoll.ac.uk

HNC GREEN PLEDGE

Looking for an apprenticeship?

Sygenta will be in College on Thursday 6th February at 12.15pm to talk about the apprenticeships that they have available. Email b.burgin@huddnewcoll.ac.uk to confirm your place

The Tour de Yorkshire is looking for volunteers! If you are aged 18 or over, you can visit www.letour.yorkshire.com to register
