Geography

Vision: At Hollybrook Schools, our vision for geography is to inspire a lifelong curiosity and fascination about the world, its people and its environments. Through engaging, relevant and inclusive learning experiences, we empower our pupils to explore, understand and care for the diverse places and cultures that shape our planet.

Intent: We aim to:

- Nurture a sense of wonder and exploration through helping children develop foundational skills to observe, question and understand their own surroundings and the wider world.
- Encourage pupils to investigate physical and human processes, critically analyse information and reflect on their role as global citizens.
- Equip children with the knowledge, skills and values needed to navigate a rapidly changing world, fostering curiosity, empathy and a sense of responsibility for our planet and its people.

Implementation: How will we achieve our aims?

Allow children the chance to compare and contrast their immediate environment and wider world, learn about different locations and complete mapping. Provide practical activities and hands-on learning, allowing pupils to recognise the connections between themselves, their local environment and global communities.

What do Hollybrook pupils learn to do in Geography? (Disciplinary Knowledge)
