Dear Parent/Carer,

Engineering & STEM Inspiration Day at Liverpool John Moores University

I am pleased to offer students the opportunity to attend a **STEM Inspiration Day** at **Liverpool John Moores University (LJMU), School of Engineering and Built Environment**, on **Monday 2nd November, 9.30am-2.00pm**.

This exciting event is designed to inspire young people who are interested in engineering, technology and the built environment. Students will take part in a range of interactive workshops and activities delivered by university staff and industry professionals.

During the day, students will explore areas including:

- Civil Engineering
- Mechanical and General Engineering
- Electrical & Electronic Engineering
- Construction Management
- Quantity Surveying
- Real Estate and the Built Environment

The event is organised as a carousel of hands-on sessions, giving students the opportunity to experience different engineering disciplines, develop their understanding of future careers, and meet the people working and studying within these sectors.

This is an excellent opportunity for students to:

- Learn about engineering and STEM careers
- Experience university facilities and teaching environments
- Take part in practical, engaging activities
- Gain inspiration for future study and career pathways
- Develop a deeper understanding of the wide range of opportunities available within engineering and the built environment

Lunch will be provided free of charge by LJMU but there will be a £6.50 payment required for the transport.

This trip is open to:

- All Year 10&12 **Engineering** students
- Year 9 students who are **considering choosing Engineering** as one of their KS4 option subject

If your child would like to attend, please complete the reply slip below and return it to the Engineering Department by **Friday 9th October**.

Thank you for your continued support,

Yours faithfully,

R Williams

Subject Lead: DT & Engineering

r.williams@holyfamilyhighschool.co.uk

Please return to Mrs Williams by 9th October

STEM Inspiration Day - LJMU
