

Remember
we
learned:

Year 2 - Continents,
oceans
Year 3 - compass
points
Year 5 - Global
maps and OS maps

Year 6

**Locational
Knowledge**
Latitude and
longitude

Later, in
Y6, you will
learn:

KS3 locational
knowledge - focusing
on their
environmental
regions, including
polar and hot deserts

Understand:

1	To know about lines of latitude and longitude and what they measure
2	To name the 5 major lines of latitude
3	Understand different time zones (meridians)
4	To know that there are two polar regions - Arctic and Antarctic - and where they are located
5	To recognise similarities and differences between the Arctic and Antarctic
6	Understand that Arctic biome is tundra and the Antarctic tundra is a desert

Can you remember?

The continents?

The main biomes?

Where the equator and tropics are?

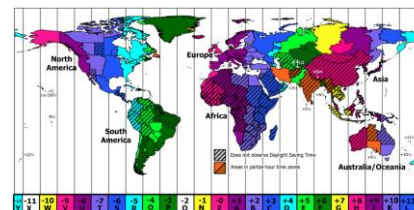

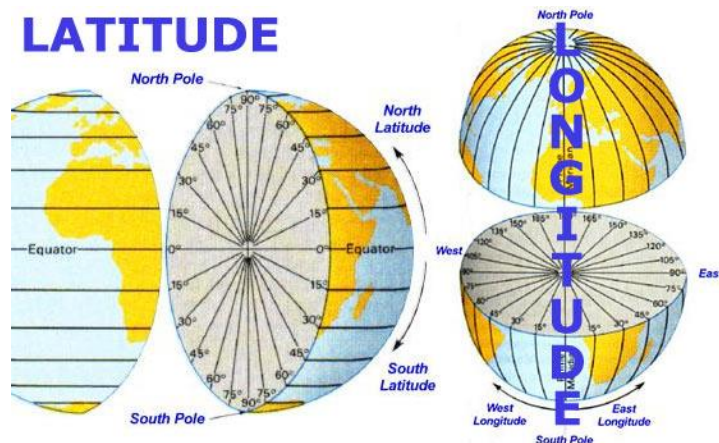

Year 6 retrieval questions

1. What are the imaginary lines called that run parallel to the Equator?
2. Why do different countries have different time zones?
3. Name one similarity and one difference between the two polar regions
4. Enquiry question: Why is Antarctica considered to be a desert biome?

Key Vocabulary

- Latitude
- Longitude
- Equator
- Tropic of Cancer
- Tropic of Capricorn
- Arctic circle
- Antarctic circle
- Meridian
- Hemisphere
- Flora
- Fauna

LATITUDE

TYPES OF BIOME
