## Calculation Policy

## Addition \& Subtraction

## Addition

## Key Vocabulary

Addend - A number to be added to another.

Aggregation - combining two or more quantities or measures to find a total.

Augmentation - increasing a quantity or measure by another quantity.

Commutative - numbers can be added in any order.

Complement - in addition, a number and its complement make a total e.g. 300 is the complement to 700 to make 1,000

Regroup - A new group is formed of tens and ones
Skill: Add 1-digit numbers within 10

| Skill: Add 1-digit and 2-digit numbers to 10 |  |  |  |  |  |  |  |  |  |  | Year: 2/3 |
| :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: |
| 5 <br> ? <br> 38 <br> $38+5=43$ |  |  |  |  |  |  |  |  |  |  | When adding single digits to a two-digit number, children should be encouraged to count on from the larger number. <br> They should also apply their knowledge of number bonds to add more efficiently e.g. $8+5=13$ so 38 $+5=43$. <br> Hundred squares and straws can support children to find the number bond to 10 . |

| Skill: Add two 2-digit numbers to 100 |  | Year: 2/3 |
| :---: | :---: | :---: |
|  | $38+23=61$ $\begin{array}{r} 38 \\ +23 \\ \hline 61 \\ \hline 1 \end{array}$ | At this stage, encourage children to use the formal column method when calculating alongside straws, base 10 or place value counters. As numbers become larger, straws become less efficient. <br> Children can also use a blank number line to count on to find the total. Encourage them to jump to multiples of 10 to become more efficient. |

| Skill: Add with up to 3 decimal places |  |  |  | Year: 5 |
| :---: | :---: | :---: | :---: | :---: |
|  <br> (1). |  | 2.41 <br> 6.06 | $\begin{array}{r} 3.65 \\ +2.41 \\ \hline 6.06 \\ \hline 1 \\ \hline \end{array}$ | Place value counters and plain counters on a place value grid are the most effective manipulatives when adding decimals with 1,2 and then 3 decimal places. <br> Ensure children have experience of adding decimals with a variety of decimal places. This includes putting this into context when adding money and other measures. |

## Subtraction

## Key Vocabulary

Difference - the numerical difference between two numbers is found by comparing the quantity in each group.

Exchange - Change a number or expression for another of an equal value.

Minuend - A quantity or number from which another is subtracted.

Partitioning - Splitting a number into its component parts.

Reduction - Subtraction as take away.
Subitise - Instantly recognise the number of objects in a small group without needing to count.

Subtrahend - A number to be subtracted from another.

Sum - The result of an addition.
Total - The aggregate or the sum found by addition.

| Skill: Subtract 1 and 2-digit numbers to 20 | Year: 1/2 |
| :---: | :---: |
|  | When subtracting one-digit numbers that cross 10 , it is important to highlight the importance of ten ones equalling one ten. <br> Children should be encouraged to find the number bond to 10 when partitioning the subtracted number. Ten frames, number shapes and number lines are particularly useful for this. |

| Skill: Subtract numbers with up to 3 digits |  |  |  |  |  |  | Year: 3 |
| :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: |
|  |  | $273$ <br> 43 | $-27$ $\begin{array}{r} 3135 \\ -\quad 273 \\ \hline 262 \\ \hline \end{array}$ | $=26$ | Tens <br> $0 \varnothing$ <br> $\varnothing \varnothing \varnothing$ |  | Base 10 and place value counters are the most effective manipulative when subtracting numbers with up to 3 digits. <br> Ensure children write out their calculation alongside any concrete resources so they can see the links to the written column method. <br> Plain counters on a place value grid can also be used to support learning. |
