

16th May 2022

Dear families,

I am delighted to inform you about our new **'Family App'** on Evidence for Learning. Since February 2022 we have been using an online system to capture photographic and video evidence of students and recording staff observation comments.

The 'Family App' will provide access for you to view all of the wonderful evidence from school and share it with your child at home. You can also upload photos/videos and comments from home so we can share these in class with your child and their peers. Evidence for Learning is a secure online platform who pride themselves in online security, if you would like any more information their company and the data they hold about you please contact me.

Thousands of other schools across the country use Evidence for Learning and have found it a great opportunity to develop home school communication and support conversations at home and school about what each student has been busy doing.

As we get used to Evidence for Learning we will be adding more evidence for you to see, however, to begin with we have asked classes to share at least 2 pieces with you per week.

We will create logins for families using the email addresses you have already provided school and you will receive an email from Evidence for Learning over the coming days. Please follow the instructions on the email to download the Family Portal app and login. We have created a short video guide to help support you at home (click here to watch the video) and if you would like any support setting your device up we are holding a Parent Coffee Morning on Friday 20th May at 9:30am where we will have the opportunity to get you up and running.

Please complete this permission form for us to use your email address:

<https://forms.office.com/r/4Lr3kzSgLR>

[Click here](#) to view our 'How to Guide' for support with using the Family App.

If you have any questions please get in touch with me.

Kind regards,

George Turner

Deputy Headteacher
