## Shape, Space & Measures

Name: \_\_\_\_\_

By the end of Year 4...

To understand the properties of shapes		<ul style="list-style-type: none"> <li>*I can compare and classify geometric shapes, including quadrilaterals and triangles, based on their properties and sizes.</li> <li>*I am beginning to classify different types of triangles, such as equilateral, scalene, isosceles and right-angled.</li> </ul>
		<ul style="list-style-type: none"> <li>*I can identify acute and obtuse angles and compare and order angles up to two right angles by size.</li> </ul>
		<ul style="list-style-type: none"> <li>*I can recognise the line of symmetry in a variety of diagrams, including where the line of symmetry does not dissect the original shape.</li> <li>*I can complete simple symmetric figures when using a vertical or horizontal line of symmetry.</li> </ul>
To describe position, direction and movement		<ul style="list-style-type: none"> <li>*I can describe movements between positions as translations of a given unit to the left/right and up/down.</li> <li>*I can use the directional terminology: clockwise/ anticlockwise, 90° to describe position, direction and movement.</li> </ul>
		<ul style="list-style-type: none"> <li>*I can describe positions on a 2-D grid as coordinates in the first quadrant.</li> <li>*I can plot specified points and draw sides to complete a given polygon.</li> </ul>
To use measures		<ul style="list-style-type: none"> <li>*I can convert between different units of measure. (E.g. kilometre to metre, hour to minute) using multiplication and division.</li> </ul>
		<ul style="list-style-type: none"> <li>*I can measure and calculate the perimeter of a rectilinear figure (including squares) in centimetres and metres. <i>[expressing perimeter algebraically: <math>2(a+b)</math>]</i></li> <li>*I can find the area of rectilinear shapes by counting squares.</li> </ul>
		<ul style="list-style-type: none"> <li>*I can read, write and convert time between analogue and digital 12- and 24-hour clocks.</li> <li>*I can solve problems involving converting from hours to minutes, minutes to seconds, years to months, weeks to days.</li> </ul>
		<ul style="list-style-type: none"> <li>*I can estimate, compare and calculate different measures, including money in pounds and pence.</li> </ul>
To use statistics		<ul style="list-style-type: none"> <li>*I can interpret and present discrete and continuous data using appropriate graphical methods, including bar charts and time graphs.</li> </ul>
		<ul style="list-style-type: none"> <li>*I can solve comparison, sum and difference problems using information presented in bar charts, pictograms, tables (i.e. Venn diagrams and Carroll diagrams) and other graphs.</li> </ul>
To use algebra		<ul style="list-style-type: none"> <li>*I can solve addition and subtraction, multiplication and division problems that involve missing numbers. E.g. Perimeter = <math>2(a+b)</math>; <math>P= 36\text{cm}</math>; <math>a= 6\text{cm}</math>.</li> <li>*I can use my knowledge to solve routine and non-routine problems. E.g. possibility of set menu combinations.</li> </ul>
