

Vocabulary	Definition
Amphibians	Amphibians live in water as babies and on land as they grow older. They have smooth, slimy skin.
Birds	All birds have a beak, two legs, feathers and wings.
Mammals	Mammals are animals that breathe air, grow hair, or fur and feed on their mothers milk as a baby
Reptiles	All reptiles breathe air. They have scales on their skin.
Carnivore	Animals that mostly eat other animals (meat) are carnivores.
Herbivore	Animals that only eat plants are herbivores.
Omnivore	Animals that eat both plants and other animals are omnivores.
Fish	Fish live and breath under water. They have scaly skin and they breath through their gills.
Sight	Your eyes let you see all the things around you.
Hearing	Your ears let you listen to all the things around you. Your brain is able to tell what different sounds are.
Touch	Your skin gives you the sense of touch. Your can tell is something is hot or cold.
Smell	You smell using your nose. Your nose can tell if things smell nice or not.
Taste	Your sense of taste comes from your tongue.
