

# Year 5 Learning Log

We don't want you to miss out on learning while we are staying off school to keep everyone safe. Get as creative as you can. Could you keep an illustrated diary while you aren't at school? This could form a primary source of historical evidence in the future!

Experiment with reversible and irreversible changes using materials around your home. Write up your method and results in a scientific way and include diagrams. (Make sure you ask permission first!)

The Alps are fascinating as they span multiple countries. Could you build a scale model of this mountain range (get inventive!) and/ or find out 5 facts about each country it is part of? Maybe you could learn how to say hello in each of their languages.

Imagine you are the most successful businessperson in Preston. You want to open a new shop and attached café containing only Fair Trade items. Create a poster (or other presentation) to educate your customers about where the items you stock are from and why it is important that they are Fair Trade.

Have you ever played Top Trumps? Try and create your own top trumps cards based on the Anglo Saxons and Vikings (who you have learnt about this year) and the Egyptians and Romans from Year 3 and 4. If you're feeling kind, you could provide a cheat-sheet for your players to explain why each group would win based on different categories (eg food, technology, housing, weapons).

You might be stuck at home, Year 5, but try to make the most of this time you have. How could you cheer up your family with your talent for writing or telling jokes? Is there a hobby you have always wished you could try out? The best ideas always happen when you're bored and I can't wait to hear about all the amazing creative things you get up to! From Mr Sudell 😊
