

Remote Learning Feedback Policy - Draft

- Most uploaded work will be marked using an adaptation of the system used in school. The teacher may add comments such as well done, a little more needed etc. but not all of the time and they will not be writing lengthy explanations.
- Teachers will 'Grade' an assignment using the following
 - 1 = You have achieved the objective
 - 2 = You have almost achieved the objective.
 - 3 = I need to give you some extra support to achieve the objective.
- Teachers will review work that has been completed by the due date.
- Any work handed in after the due date will not be graded.
- Teachers will try to reply to children's messages but this might not always be the case. Please assume the teacher has read a comment even if you don't get a response.
- If a parent has a query, they should speak to the class teacher by phone on 01772 774044 and when they are available they will call you. They should not use the children's chat as messages important messages may get lost in children's messages.
- In general, teachers will provide verbal feedback during the live lessons for live learning and about the independent learning that has previously taken place. If the teacher feels they need to speak to a child/ren about their independent uploaded assignments, they may ask them to stay on the live lesson and chat to them at the end when the others have gone. They may on a rare occasion set up an additional live chat to speak with the child/ren or parents.
- Some work will be self-marked by the children themselves. This does not need uploading for the teacher to mark. A record will be kept of scores in quizzes and tests.
- The teacher may give immediate feedback to the whole class and this may mean certain pieces of work do not need to be uploaded.
