

Helpful tips for the family

- Brush teeth and gums twice a day as soon the very first tooth begins to appear.
- Brushing at bedtime is the most important time.
- Ensure you use a smear of toothpaste with at least 1000 parts per million (ppm) of fluoride for 0-3 years (or for anyone who cannot spit out the foam) and a pea size amount of 1350-1500 parts per million (ppm) of fluoride for 3 years and above.
- When brushing has finished ***do not rinse with water just spit the foam out.***
- Keep sugary foods and drinks to meal times only.

Supervised tooth brushing information
for parents and carers.

What is mysmile?

It is the quality mark awarded to early year settings which fully succeed in the mysmile 4 steps.

Once achieved a certificate will be awarded to the successful settings and their accreditation is valid for 2 years with regular follow up support.

The mysmile team are always available to offer advice and provide training to early years staff so they can successfully achieve and maintain the mysmile programme.

How will children and their families benefit from taking part in the mysmile programme?

- Encourage good healthy habits.
- Learning good tooth brushing skills.
- Reducing the impact of sugar on teeth.
- Tasting more fruit and vegetables.
- Extra tooth brushing with fluoride toothpaste to strengthen teeth.
- Supporting families with access to dental care.
- Less likely to suffer with tooth decay and toothache.

How will my child's school work towards this accreditation?

Strengthen teeth

The children will brush their teeth in the setting once a day (this should not replace the twice a day at home) or support the children to brush at home by distributing toothbrushes, toothpaste and tooth brushing charts.

*consent forms will need to be signed for children to participate.

Provide a tooth friendly diet

Snacks and drinks will be tooth friendly and celebration food will be healthy or have a non-food focus.

Promote dental visits

Your child's teacher will conduct a survey to identify how many children have a dentist and support families that do not have a dentist with information on how to access dental care or advice.

Share oral health information

My smile training will be received by at least one member of staff and then shared with other staff. They will engage parents by sharing oral health messages and plan oral health activities with the children.
