

## Teaching revision: Day 2

### Subtract 10 and then small multiples of 10 from 2-digit numbers.

Day 2: Subtract 10 and then small multiples of 10 from 2-digit numbers.

1-100 grid

1	2	3	4	5	6	7	8	9	10
11	12	13	14	15	16	17	18	19	20
21	22	23	24	25	26	27	28	29	30
31	32	33	34	35	36	37	38	39	40
41	42	43	44	45	46	47	48	49	50
51	52	53	54	55	56	57	58	59	60
61	62	63	64	65	66	67	68	69	70
71	72	73	74	75	76	77	78	79	80
81	82	83	84	85	86	87	88	89	90
91	92	93	94	95	96	97	98	99	100

How do we  
find 10 less  
than 70?

$$70 - 10 = 60$$

Day 2: Subtract 10 and then small multiples of 10 from 2-digit numbers.

1-100 grid

1	2	3	4	5	6	7	8	9	10
11	12	13	14	15	16	17	18	19	20
21	22	23	24	25	26	27	28	29	30
31	32	33	34	35	36	37	38	39	40
41	42	43	44	45	46	47	48	49	50
51	52	53	54	55	56	57	58	59	60
61	62	63	64	65	66	67	68	69	70
71	72	73	74	75	76	77	78	79	80
81	82	83	84	85	86	87	88	89	90
91	92	93	94	95	96	97	98	99	100

$$70 - 20 = 50$$

Now find 20 less  
than 70.  
Remember that this  
is two lots of 10 or  
2 jumps of 10.

## Teaching revision: Day 2

### Subtract 10 and then small multiples of 10 from 2-digit numbers.

Day 2: Subtract 10 and then small multiples of 10 from 2-digit numbers.

1-100 grid

1	2	3	4	5	6	7	8	9	10
11	12	13	14	15	16	17	18	19	20
21	22	23	24	25	26	27	28	29	30
31	32	33	34	35	36	37	38	39	40
41	42	43	44	45	46	47	48	49	50
51	52	53	54	55	56	57	58	59	60
61	62	63	64	65	66	67	68	69	70
71	72	73	74	75	76	77	78	79	80
81	82	83	84	85	86	87	88	89	90
91	92	93	94	95	96	97	98	99	100

Can you find 10  
less than 39?

$$39 - 10 = 29$$

Day 2: Subtract 10 and then small multiples of 10 from 2-digit numbers.

1-100 grid

1	2	3	4	5	6	7	8	9	10
11	12	13	14	15	16	17	18	19	20
21	22	23	24	25	26	27	28	29	30
31	32	33	34	35	36	37	38	39	40
41	42	43	44	45	46	47	48	49	50
51	52	53	54	55	56	57	58	59	60
61	62	63	64	65	66	67	68	69	70
71	72	73	74	75	76	77	78	79	80
81	82	83	84	85	86	87	88	89	90
91	92	93	94	95	96	97	98	99	100

$$39 - 20 = 19$$

Now find 20  
less than 39.

## Teaching revision: Day 2

### Subtract 10 and then small multiples of 10 from 2-digit numbers.

Day 2: Subtract 10 and then small multiples of 10 from 2-digit numbers.

1-100 grid

1	2	3	4	5	6	7	8	9	10
11	12	13	14	15	16	17	18	19	20
21	22	23	24	25	26	27	28	29	30
31	32	33	34	35	36	37	38	39	40
41	42	43	44	45	46	47	48	49	50
51	52	53	54	55	56	57	58	59	60
61	62	63	64	65	66	67	68	69	70
71	72	73	74	75	76	77	78	79	80
81	82	83	84	85	86	87	88	89	90
91	92	93	94	95	96	97	98	99	100

$$83 - 10 = 73$$

Try to find 10 less than 83.

Day 2: Subtract 10 and then small multiples of 10 from 2-digit numbers.

1-100 grid

1	2	3	4	5	6	7	8	9	10
11	12	13	14	15	16	17	18	19	20
21	22	23	24	25	26	27	28	29	30
31	32	33	34	35	36	37	38	39	40
41	42	43	44	45	46	47	48	49	50
51	52	53	54	55	56	57	58	59	60
61	62	63	64	65	66	67	68	69	70
71	72	73	74	75	76	77	78	79	80
81	82	83	84	85	86	87	88	89	90
91	92	93	94	95	96	97	98	99	100

$$83 - 20 = 63$$

What is 20 less than 83?

Now try the Day 1 Sheet 1 practice sheet. Cut up the 10s cards and use either the 10s and 20s (easier) or the whole set (harder). Use the 100 grid to help.
