Sources of information	Sources of information are the things we use to find out about a topic like books, dairies, photographs, the internet.
Timeline	A timeline shows events in the order that they happened.

Exciting Books

Big Question: Who is Mary Anning and why do we remember her?

Sticky Knowledge:

Dinosaurs existed millions of years ago – before humans lived on Earth. They are now extinct. When they became extinct their remains were left behind as fossils.

As a child, Mary's father took her and her brother to the beach every day. They spent hours looking for fossils. He taught her how to get the fossils out of the rock by carefully chipping the rock away from the fossil using a hammer and chisel.

Mary met a fossil expert called Elizabeth Philpot. She became even more interested in fossil hunting.

She went on to make many amazing discoveries, which included the first complete fossils of: • an ichthyosaur • a plesiosaur • a pterosaur

She died in 1847 but is remembered as one of the greatest fossil hunters ever.
