

UNITED SCHOOLS TRUST
Kingsteignton School

Policy for supporting students with medical conditions and for the administration of medicine

1. The staff of Kingsteignton School wish to ensure that pupils with medical needs receive proper care and support. Our intention is to ensure that pupils with medical conditions should have full access to education including trips and PE. The trustees will ensure that staff are supported, trained and competent before they take on the responsibility of supporting children with medical conditions.
2. The school's insurance will cover liability relating to the administration of medication.
3. The school administrator will be responsible for ensuring the following:
 - The procedures outlined in this policy are followed when notification is received that a pupil will be attending who has a medical condition during Staff Training and Meeting sessions and on additional occasions as and when needed.
 - That procedures outlined in this policy are followed when a pupil moves to the school mid-term or when a pupil has a new diagnosis are followed
 - Ensuring that the appropriate medical form is completed by the parent and that asthma inhalers/spacers provided by the parent are given to the child's teacher so that they can be kept close at hand, eg in the school classroom. They will be administered under the supervision of the class teacher/teaching assistant.
 - That the procedures for dealing with specialised equipment - eg defibrillators will be reviewed as and when the equipment is on site and training is given as and when appropriate.
4. The above procedures will be monitored and reviewed by the Principal.
5. Where identified as being necessary, Individual Health Care Plans (IHCP) will be developed between Kingsteignton School, healthcare professionals

and parents so that the steps needed to help a pupil manage their condition and overcome any potential barriers to get the most from their education are identified. The IHCP will include:

- (a) The pupil's medical condition, its triggers, symptoms, medication needs and the level of support needed in an emergency. Also it must include any treatments, time, facilities, equipment, testing and access to food or drink (where it is used to manage their condition), dietary requirements and environmental issues such as crowded corridors and travel time between lessons.
- (b) Specific support for the pupil's education, social and emotional needs, such as how will absences be managed, requirements for extra time to complete exams, use of rest periods or counselling sessions.
- (c) Who will provide this support, their training needs, and expectations of their role and confirmation of proficiency to provide support from a healthcare professional?
- (d) Cover arrangements and who in the school needs to be aware of the pupil's condition and the support required including supply staff.
- (e) Arrangements for written permission from parents for medication.
- (f) Arrangements or procedures for school trips or other school activities outside the normal timetable; completion of risk assessments for visits and school activities outside the normal timetable.
- (g) The designated individuals to be entrusted with the above information.
- (h) Procedures in the event of the pupil refusing to take medicine or carry out a necessary procedure.

6. The Principal will have the final decision on whether an Individual Health Care Plan is required.

Pupils with asthma

7. Kingsteignton School has decided to hold an emergency inhaler and spacer for the treatment of an asthma attack.

8. The Principal will be responsible for ensuring the following:
- Instructing all staff on the symptoms of an asthma attack
 - Instructing all staff on the existence of this policy
 - Instructing all staff on how to check the asthma register
 - Instructing all staff on how to access the inhaler
 - Making all staff aware of who the designated staff are and how to access their help.

9. The Principal will be responsible for ensuring that designated staff:
 - Recognise the signs of an asthma attack and when emergency action is necessary
 - Know how to administer inhalers through a spacer
 - Make appropriate records of attacks
10. The Principal and School Administrator will be responsible for the storage, care and disposal of asthma medication.
11. The Principal will be responsible for ensuring that there has been written consent from parents for the administration of the emergency inhaler and spacer. The emergency inhaler/spacer will only be available for pupils who have been diagnosed with asthma and have been prescribed reliever inhaler AND for whom parental consent has been given. This information shall be recorded in the pupil's IHCP plan.
12. The Principal will be responsible for the supervision of arrangements for administration of medication and for maintaining the asthma register.
13. The Principal will be responsible for ensuring parents are informed in writing when the emergency inhaler/spacer has been used.

THE ADMINISTRATION OF MEDICINE

14. The Principal will accept responsibility in principle for members of school staff giving or supervising a pupil prescribed medication during the day.
15. Any parent/carer requesting the administration of medication will be directed to a copy of this policy which is listed on our school website.
16. Prescribed medication will be accepted and administered in the school.
17. Non-prescription medication will be administered following national guidance which states the following: *'No child under 16 should be given prescription or non-prescription medicines without their parent's written consent. Schools should set out the circumstances in which non-prescription medicines may be administered.'* (Reference: supporting pupils at school with medical conditions. Statutory guidance for governing bodies of maintained schools and proprietors of academies in England DoE. December 2015)

This is clear that non-prescription medicines (over the counter medicines) can be administered following written permission by the child's parent (NHS Northern, Eastern and Western Devon Clinical Commissioning Group).

18. Prior written parental consent is required before any medication can be administered, either prescribed or non-prescribed (over the counter) using a standard form provided by the administrator.
19. Only reasonable quantities of medication will be accepted.
20. Each item of medication should be delivered in its original dispensed container and handed directly to the Principal or School Administrator.
21. Each item of medication should be clearly labelled with the following information:
 - Pupil's name
 - Name of medication
 - Dosage
 - Frequency of dosage
 - Date of dispensing
 - Storage requirements (if important)
 - Expiry date (if available)
22. The school will not accept items of medication which are in unlabelled containers or not in their original container.
23. Unless otherwise indicated, all medication to be administered in the school will be kept in the locked fridge in the classroom or SEND room.
24. Pupils will not be allowed to administer their own medication.
25. It is the responsibility of parents/carers to notify the school if there is a change in medication, a change in dosage requirements, or the discontinuation of a pupil's need for medication.
26. Staff who assist in the administration of invasive medication will receive appropriate training/guidance through arrangements made with the school's Nurse Service. In pre-school settings arrangements will be made through Primary Care Health Visitors.

27. The school will make every effort to continue the administration of medication to a student whilst on activities away from the premises.
