

Science

Spring 2 Year 2

ESSENTIAL VOCABULARY

Key words	Definitions
suitability	Whether the material is a good fit for the objects purpose.
man made	A material or object that is invented by humans.
natural	A material that comes from living things and is not changed
properties	The qualities and characteristics of an object

Everyday Materials

What will I know at the end of the unit?

- To identify a range of materials.
- Identify that different materials are suitable for different objects and their purpose.
- I know the difference between man-made materials and natural materials.

Key Concepts

Materials are what objects are made from such as wood, plastic, metal, glass, fabric, paper, and rock.

Objects and materials are different.

An object is the thing you use.

A material is what it is made from.

Materials have different properties. Properties describe what a material is like. For example, materials can be hard or soft, strong or weak.
