What changes happen in Autumn?

Science

ESSENTIAL VOCABULARY	
Season	One of four parts of the year
Autumn	3rd season cooler and leaves fall.
Temperature	How hot or cold it is
Deciduous	Trees that lose their leaves
Evergreen	Trees that stay green all year
Hibernate	Animals that sleep though winter

Key Concepts

Autumn comes after summer and before winter.
The weather gets colder, windier and wetter.
Leaves change colour and fall from trees.
Days get shorter and nights get longer.
Some animals collect food or hibernate for winter.
Trees are not dying but sleeping
Harvest time happens in autumn
We react to the change within our daily lives.

Scientist

Francis Beaufort

Sir Francis is famous for being the creator of the Beaufort scale.
When Francis started his life at sea, he kept a weather diary.
It was during a trip in the seas surrounding South America, that Sir Francis created a scale that measures wind speed.

What I will know at the end of the topic.

I can name the four seasons in order	
I can describe what happen in autumn	
I can spot how trees and animals change in autumn	
I can explain how daylight changes in autumn	
I can talk about deciduous and evergreen	
I can talk about the weather in autumn
