Where do animals and birds go in Autumn?

Science

Cedar Class Autumn 2

Scientist
Chris Packham Chris Packham is a British naturalist who studies animals and their habitats. He is interested in how animals survive during different seasons and helps us understand how animals adapt when the weather becomes colder and food is harder to find. 

ESSENTIAL VOCABULARY	
Autumn	The season after summer and before winter.
hibernate	When an animal becomes inactive and its body slows down to save energy.
migrate	Travel to another place for a warmer climate.
adapt	Changing to help you survive when things around you change.
Season	One of four parts of the year with different weather.
dormant	Resting or not growing, often during Winter.

What I will know at the end of the unit.	
How different animals prepare for winter months in the UK.	
How different animals prepare for winter months in the Arctic.	
That birds migrate to a warmer climate and the paths they will follow.	
How birds and mammals in the UK find food during the winter months.
