

## Remote Education Provision

Our remote education provision is delivered exclusively through **Class Dojo**, which provides a secure, accessible, and interactive platform for all teaching and learning activities.

Messages will be sent via Class Dojo to **notify parents of the school closure and the remote learning plan**.

Tasks, links to resources, and instructions for all subjects will be set directly within the Class Dojo platform.

## **Pupil Learning and Assessment**

We utilise the **Class Dojo Portfolio** feature to manage the learning cycle.

- **Setting Tasks:** Teachers will set specific **assignments and activities**, including instructions, videos, or links to external resources, which appear directly in the **pupil's Portfolio feed**.
- **Submitting Work:** **Pupils are required to use their Class Dojo Portfolios to upload their completed work**. This might be a photograph of written work, a document, a video, or an image of a creative activity.
- **Feedback:** Teachers will **check the submitted work** via the Portfolios and feedback will be provided to pupils **online** using the tools available within Class Dojo.
- **Expected Engagement:** Pupils are expected to **engage with and complete the set tasks** as they would during a normal school day. Teachers will monitor **engagement** and provide support as needed.

Should you experience any technical difficulties accessing or using Class Dojo, please **contact the school office by email**, which will be monitored throughout the closure period.
