

BE ON TIME!

Recently, too many pupils have been arriving late at school in the mornings.

Mon 31 May
Bank Holiday (School Closed)

If your child is in **Y1, Y2, Y4 or Y6** they **must** arrive at their classroom door **before 8.50am**. Lessons will then begin.

Tues 1 - Fri 4 June (inclusive)
Half-Term Break
(School Closed)

If your child is in **Rec L and Rec B, Y3 or Y5** they **must** arrive at their classroom door **before 9.00am**. Lessons will then begin.

Parents' Forum
Wednesday 9 June 6.00pm
(Online Via Zoom)

LATENESS CAUSES MASSIVE PROBLEMS.

Thursday 10 June
Reception Screening
Programme
(Height, Weight & Vision)

If the lesson has already started, pupils who walk in late:

- interrupt learning for others (who are trying to focus and listen).
- interrupt the teaching - sometimes the teacher has to start again!
- miss out on learning. This is when gaps start to appear in their learning, which means that they might require extra support later in the lesson and are less able to contribute and follow what's going on.
- feel embarrassed, are overly self-conscious and have a negative start to their school day.

EVERYday
counts
attendance matters

Attendance Matters

This Week's Attendance

☹️ 95.3% ☹️

Class with the Best Attendance

😊 6L - 97.9% 😊

Most Punctual Class

😊 1L, 2L & 2B 😊

If your children regularly arrive after their start time, then please think about the negative impact that this is having on themselves and others.

Remember how important
it is to be in school
all day, every day.

Thank you.

Each week, we focus on work undertaken by a different class. It has been the turn of 4L, who ask ...

Are we killing species before they've been discovered?

This term, we have been looking into the problem of plastic pollution. We have written our own newspaper reports to tell the story of an unknown species, which was found washed up on the coast of Cornwall. It was found to have consumed great quantities of rubbish. The children have been using metaphors, similes, repetition, alliteration and personification to make their reports as engaging as possible. Next week, we will be using the skills we have learnt to write a newspaper report of the Titanic.

95% of the world's oceans remains unexplored.

Writing

Mysterious mammal found dead on beach

Majestic creature washed up after being poisoned by pollution on Cornwall beach.

An enormous, majestic sea creature has been found dumped on St Ives' cornish coast, at 11am on Friday.

The unidentified creature was discovered, having scuffed on our waste. Are we killing animals with plastic?

Local dog walker Jack who has been walking dogs on this beach for 25 years was the first to discover this tragedy.

"It looked like a giant seal at first," he said. "I'd never seen anything like it before," he continued.

At 6pm, lifeguard Jessie Jones, who was new to the job, joined the horrific scene.

"As I arrived, the crowd were pulling out our discarded trash from the creature so I ran to help.

I could faintly hear the creature struggling, sobbing and suffocating. The devastated creature was tragically crying like a baby.

Without hesitation we rapidly ripped out ropes from its blow hole. The kids' dedication to save the creature was astounding. They were running to the ocean with their buckets to calm the creature, to get it to breathe and willing it to survive. It was unbearable.

Science professor at Cornwall university described the unusual grunting noise that the creature made and the sparkling glowing light that went down its spine.

A few minutes later, there was a whirring sound like a helicopter, followed by a curious flash from the creature's body.

He went on to say, "At first we thought it was breathing but quickly its energy left the creature and unfortunately it passed away." The beach went silent. Some people kicked the sand. Some looked down, ashamed. Heart-wrenching. We know it had fallen. The sea clutched the enigmatic animal with its tight grip and took its baby back to its destination.

An overwhelming ocean of emotion swept rapidly over the local residents as they found out the creature passed away.

The World Animal Index, who identify new animals, have said the species remains an anonymous creature.

This disgraceful failure is remarkable - if we just offer the chance.

All over the world people are burnt popcorn being thrown away.

Did you know, scientists know more about the surface of the Moon than they do about the ocean floor?

Every day 8 million pieces of plastic make their way into the ocean.

CORONAVIRUS...

- if in doubt, please stay at home and get tested.
- if your child or any member of your household shows any COVID symptoms (high temperature, a new, continuous cough, loss or change to your sense of smell or taste), please keep everyone at home until everyone has had a negative test.

REMINDER

If you are under instruction to self-isolate, even if your LFD or PCR test result comes back as negative, you MUST continue to isolate for the whole of the 10 day period.

The isolation period also applies, even if you have been vaccinated.

SELF-ISOLATION MEANS SELF-ISOLATION.

YOU SHOULD NOT HAVE ANY CONTACT WITH ANYONE OUTSIDE YOUR HOME OR SUPPORT BUBBLE.

WE CANNOT STRESS HOW IMPORTANT THIS IS.
