## **These points provide the essential framework for our school's medical conditions policy.**

Ladybridge is an inclusive community that aims to support and welcome pupils with medical conditions.

Our medical conditions policy is drawn up in consultation with a wide-range of local key stakeholders within both the school and health settings.

The medical conditions policy is supported by a clear communication plan for staff, parents / carers and other key stakeholders to ensure its full implementation.

All staff understand and are trained in what to do in an emergency for the most common serious medical conditions at this school.

All staff understand and are trained in the school's general emergency procedures.

- Appropriate training relevant to pupil health care plans delivered by the appropriate health professionals eg. Diabetic injections; infection control; asthma training.
- Annual anaphylaxis training for all staff delivered by the school nurse

All school staff have been informed through training that they are required, under common law duty of care, to act like any reasonably prudent parent in an emergency situation. This may include taking action such as administering medication.

This school has clear guidance on the administration of medication at school.

This school has clear guidance on the storage of medication at school.

This school has clear guidance about record keeping.

This school ensures that the whole school environment is inclusive and favorable to pupils with medical conditions. This includes the physical environment, as well as social, sporting and educational activities.

This school is aware of the common triggers that can make common medical conditions worse or can bring on an emergency. The school is actively working towards reducing or eliminating these health and safety risks and has a written schedule of reducing specific triggers to support this.

Each member of the school and health community knows their roles and responsibilities in maintaining and implementing an effective medical conditions policy.

The medical conditions policy is regularly reviewed, evaluated and updated. Updates are produced every year, and staff, parents / carers and pupils are regularly reminded/made aware of issues pertaining to this policy eg. No nuts; asthma cards/inhalers; epi-pen checks, health care plans, etc.

Ladybridge understands that it has a responsibility to make the school welcoming and supportive to

pupils with medical conditions who currently attend and to those who may enrol in the future.

Pupils with medical conditions are encouraged to take control of their condition. Pupils feel confident in the support they receive from the school to help them do this.

Action for staff to take in an emergency for the common serious conditions at Ladybridge is displayed in prominent locations for all staff including classrooms, kitchens and the staff room\*.

Ladybridge uses Healthcare Plans to inform the appropriate staff of pupils in their care who may need emergency help.

Ladybridge has procedures in place so that a copy of the pupil's Healthcare Plan is sent to the emergency care setting with the pupil. On occasions when this is not possible, the form is sent (or the information on it is communicated) to the hospital as soon as possible. A copy of all Health care Plans is kept on CPOMS which is accessed by relevant staff and an electronic copy is saved in all staff / Medical Information / Healthcare plans.

If a pupil needs to be taken to hospital, a member of staff will always accompany them and will stay with them until a parent / carer arrives. The school tries to ensure that the staff member will be one the pupil knows.

Generally, staff should not take pupils to hospital in their own car. This school has clear guidance from the local authority on when (and if) this is appropriate

### **Admission**

Parents/ carers hold responsibility for informing the school about their child's medical needs.

Prior to admission, parents / carers at this school are asked if their child has any health conditions or health issues on the data collection form, which is filled out at the start of each school year.

Parents / carers of new pupils starting at other times during the year are also asked to provide this information on data collection forms. Relevant school staff will have been made aware of the pupil's particular health needs and their medication requirements on a 'need to know basis', as well as having access to the individual pupil based risk assessment.

### **Post-Admission**

Following admission Parent/Carers are expected to inform school immediately of any changes of their child health and medication needs as and when these may arise. Any change in medication, dosage or times to be given will require the immediate completion of a new 'Medication Consent Form'.

### **Illness**

To prevent the spread of illness/infection, hand sanitisers have been fitted in each classroom, and children are encouraged/directed to wash their hands throughout the day.

If a child feels unwell and/or there is evidence of illness (eg. Vomiting, diarrhoea, rash, temperature change , etc), then the child is removed from class, to the office area, so they are away from other children. In addition, any 'affected/infected' area is cleaned using 'Vomit kits' (which kill all bacteria) and bacterial wipes. Parents / carers are contacted to collect their child as soon as possible, and are then given appropriate advice to ensure children do not return to school too soon,(follow the 48 hour

rule) to ensure adequate time for any illness/infection to no longer be contagious and spread. These measures help to prevent the spread of illness/infection.

### **Administration – emergency medication**

All pupils at this school with medical conditions have easy access to their emergency medication.

Pupils who do not carry and administer their own emergency medication know where their medication is stored and how to access it.

Pupils who do not carry and administer their own emergency medication understand the arrangements for a member of staff (and the reserve member of staff) to assist in helping them take their medication safely.

For pupils with asthma, and who do not have access to their inhaler/medication, school has access to emergency inhalers. These are used in accordance with the inhaler guidance (see appendices), and parents / carers must have signed a consent form before these can be used. (Form 5 appendices) The inhalers, consent form letter and guidance are kept together in the staffroom.

### **Administration – general**

If a Parent/Carer requests the administration of essential **prescribed / advised medication** for their child in school they will be given a copy of the School's Policy & Guidance. Should the administration of medication be subsequently agreed, a separate 'Medication Consent Form' or 'Asthma Record Card' will need to be completed.

All use of medication defined as a controlled drug, even if the pupil can administer the medication themselves, is done under the supervision of a named member of staff at Ladybridge Primary School.

Ladybridge understands the importance of medication being taken as prescribed.

All medication must be brought into school and collected from school by a parents or carer.

Medication to be taken orally should be supplied with an individual measure spoon or cup. Eye-drops and ear-drops similarly, should be supplied with the appropriate dropper. Unless an appropriate measure is supplied, school will not administer the medication.

All staff are aware that there is no legal or contractual duty for any member of staff to administer medication or supervise a pupil taking medication unless they have been specifically contracted to do so.

Many other members of staff are happy to take on the voluntary role of administering medication. For medication where no specific training is necessary, any member of staff may administer prescribed medication to pupils under the age of 16, but only with the written consent of the pupil's parent / carer.

Training is given to all staff members who agree to administer medication to pupils, where specific training is needed. The local authority provides full indemnity.

If a pupil at Ladybridge refuses their medication, staff record this and follow procedures. Parents / carers are informed as soon as possible.

All staff attending off-site visits are aware of any pupils with medical conditions on the visit. They receive information about the type of condition, what to do in an emergency and any other additional support necessary, including any additional medication or equipment needed.

If a trained member of staff, who is usually responsible for administering medication, is not available Ladybridge makes alternative arrangements to provide the service. This is always addressed in the risk assessment for off-site activities.

If circumstances arise wherein school is unable to administer to a pupil his/her medication, as specified and agreed on the 'Medication Consent Form', the Headteacher reserves the right to initiate the appropriate action to ensure that the child's best interests are safeguarded.

If a pupil misuses medication, either their own or another pupil's, their parents / carers are informed as soon as possible. These pupils are subject to the school's usual disciplinary procedures.

Parent/Carers can expect school to contact them immediately should concerns arise with regard to their child's general health/development, medication regime and its administration. School may similarly share particular concerns with the School Nurse and/or any other directly linked Health Consultant.

**No medication can be administered in school or by school staff at any time without the agreement of the Headteacher or their nominated representative.**

### **Safe storage – emergency medication**

Emergency medication is readily available to pupils who require it at all times during the school day or at off-site activities. If the emergency medication is a controlled drug and needs to be locked up, then a combination-lock container is used (based in the appropriate classroom, with any spare medication being kept in a combination-lock container in the office). The combination for each container must remain the same and unchanged: 000.

### **Safe storage – non-emergency medication**

All non-emergency medication is kept in a secure place, in a cool dry place. Pupils with medical conditions know where their medication is stored and how to access it.

A pupils Asthma card is stored with their inhaler.

Staff ensure that medication is only accessible to those for whom it is prescribed.

### **Safe storage – general**

There is an identified member of staff who ensures the correct storage of medication at school.

All controlled drugs are kept in a locked cupboard and only named staff have access, even if pupils normally administer the medication themselves.

As part of Health Care Plan reviews, a member of staff checks the expiry dates for all medication stored at school. However, it is parent's / carer's responsibility to ensure that all medication is in date for their child whilst they are at school. Parents must send in and collect any medication from the school office.

The identified member of staff, along with the parents / carers of pupils with medical conditions, ensures that all emergency and non-emergency medication brought in to school is clearly labelled with the pupil's name, the name and dose of the medication and the frequency of dose. This includes all medication that pupils carry themselves.

All medication is supplied and stored, wherever possible, in its original containers. All medication is labelled with the pupil's name, the name of the medication, expiry date and the prescriber's instructions for administration, including dose and frequency.

Medication is stored in accordance with instructions, paying particular note to temperature. Some medication for pupils at this school may need to be refrigerated. All refrigerated medication is stored in an airtight container and is clearly labelled. Refrigerators used for the storage of medication are in a secure area, inaccessible to unsupervised pupils or lockable as appropriate.

All medication must be collected by the parent/ carer at the end of the school year. Medication is not stored in school during the summer holidays.

It is the parent's / carer's responsibility to ensure new and in date medication comes into school on the first day of the new academic year. This must be handed in at the school office and the relevant consent paperwork completed.

**School staff are unable to accept responsibility for reminding parents/carers of pupils taking prescribed medicine(s) when supplies of such are falling low. This is particularly the case for pupils whose medication requirements that are longer term and form part of a daily regime.**

### **Safe disposal**

Parents / carers at this school are asked to collect out-of-date medication.

If parents / carers do not pick up out-of-date medication, or at the end of the school year, medication is taken to a local pharmacy for safe disposal.

A named member of staff is responsible for checking the dates of medication and arranging for the disposal of any that have expired. This check is done at the end of each term.

Sharps boxes are used for the disposal of needles. Parents/ carers obtain sharps boxes from the child's GP or paediatrician on prescription. All sharps boxes in this school are stored in a locked cupboard unless alternative safe and secure arrangements are put in place on a case-by-case basis.

If a sharps box is needed on an off-site or residential visit, a named member of staff is responsible for its safe storage and return to a local pharmacy or to school or the pupil's parent / carer.

Collection and disposal of sharps boxes is arranged with the local authority's environmental services.

## **Healthcare Plans**

### **Drawing up Healthcare Plans**

Ladybridge uses a Healthcare Plan to record important details about individual children's medical needs at school, their triggers, signs, symptoms, medication and other treatments. Further documentation can be attached to the Healthcare Plan if required.

The parents / carers and pupil with a medical condition, are asked to fill out the pupil's Healthcare Plan together with the class teacher. Parents / carers then return these completed forms to the school.

Ladybridge ensures that a relevant member of school staff is present, along with a healthcare worker, when a Healthcare Plan is written for pupils with complex healthcare or educational needs.

### **School Healthcare Plan register**

Healthcare Plans are used to create a centralised register of pupils with medical needs. An identified member of staff has responsibility for the register at Ladybridge

The responsible member of staff follows up with the parents / carers any further details on a pupil's Healthcare Plan required or if permission for administration of medication is unclear or incomplete.

### **Ongoing communication and review of Healthcare Plans**

Parents / carers at Ladybridge are regularly reminded to update their child's Healthcare Plan if their child has a medical emergency or if there have been changes to their symptoms (getting better or worse), or their medication and treatments change.

Staff at Ladybridge use opportunities such as teacher–parent interviews and home–school diaries to check that information held by the school on a pupil's condition is accurate and up to date.

Every pupil with a Healthcare Plan at Ladybridge has their plan discussed and reviewed at least once a year.

### **Storage and access to Healthcare Plans**

Parents / carers and pupils at Ladybridge are provided with a copy of the pupil's current agreed Healthcare Plan.

Healthcare Plans are kept in a secure location with the SENCO and shared with relevant staff via CPOMS

Apart from the central copy, specified members of staff (agreed by the pupil and parents/ carers) securely hold copies of pupils' Healthcare Plans. These copies are updated at the same time as the central copy.

All members of staff who work with groups of pupils have access to the Healthcare Plans of pupils in

their care.

When a member of staff is new to a pupil group, for example due to staff absence, the school makes sure that they are made aware of (and have access to) the Healthcare Plans of pupils in their care.

Ladybridge ensures that all staff protect pupil confidentiality.

Ladybridge seeks permission from parents / carers to allow the Healthcare Plan to be sent ahead to emergency care staff, should an emergency happen during school hours or at a school activity outside the normal school day. This permission is included on the Healthcare Plan.

Ladybridge seeks permission from the pupil and parents / carers before sharing any medical information with any other party, such as when a pupil takes part in a work experience placement.

### **Use of Healthcare Plans**

Healthcare Plans are used by this school to:

- \* inform the appropriate staff about the individual needs of a pupil with a medical condition in their care
- \* remind pupils with medical conditions to take their medication when they need to and, if appropriate, remind them to keep their emergency medication with them at all times
- \* identify common or important individual triggers for pupils with medical conditions at school that bring on symptoms and can cause emergencies. Ladybridge uses this information to help reduce the impact of common triggers
- \* ensure that all medication stored at school is within the expiry date
- \* ensure Ladybridge local emergency care services have a timely and accurate summary of a pupil's current medical management and healthcare in the event of an emergency
- \* remind parents /carers of pupils with medical conditions to ensure that any medication kept at school for their child is within its expiry dates. This includes spare medication.

### **Consent to administer medicines**

If a pupil requires regular prescribed medication at school, parents /carers are asked to provide consent on their child's Healthcare Plan giving the pupil or staff permission to administer medication on a regular/daily basis, if required. A separate form is sent to parents / carers for pupils taking short courses of medication.

All parents / carers of pupils with a medical condition who may require medication in an emergency are asked to provide consent on the Healthcare Plan for staff to administer medication.

If a pupil requires regular/daily help in administering their medication, then Ladybridge outlines the school's agreement to administer this medication on the pupil's Healthcare Plan. Ladybridge and parents/ carers keep a copy of this agreement.

Parents / carers of pupils with medical conditions at Ladybridge are all asked at the start of the school year on the Healthcare Plan if they and their child's healthcare professional believe the child is able to manage, carry and administer their own emergency medication.

## **Residential visits**

Parents / carers are sent a residential visit form to be completed and returned to school shortly before their child leaves for an overnight or extended day visit. This form requests up-to-date information about the pupil's current condition and their overall health. This provides essential and up-to-date information to relevant staff and school supervisors to help the pupil manage their condition while they are away. This includes information about medication not normally taken during school hours.

All residential visit forms are taken by the relevant staff member on visits and for all out-of-school hours activities where medication is required. These are accompanied by a copy of the pupil's Healthcare Plan.

All parents / carers of pupils with a medical condition attending a school trip or overnight visit are asked for consent, giving staff permission to administer medication at night or in the morning if required.

The residential visit form also details what medication and what dose the pupil is currently taking at different times of the day. It helps to provide up-to-date information to relevant staff and supervisors to help the pupil manage their condition while they are away.

## **Privacy and Confidentiality**

Staff administering medication to pupils will take all reasonable steps to ensure that the privacy and confidentiality of the pupil concerned is promoted and safeguarded.

School staff will, ideally with parental consent, liaise with other health professionals and associated professionals to ensure that there is an adequate and accurate flow of information regarding any pupil with special health needs.

## **Other record keeping**

Ladybridge keeps an accurate record of each occasion an individual pupil is given or supervised taking medication. Details of the supervising staff member, pupil, dose, date and time are recorded. If a pupil refuses to have medication administered, this is also recorded and parents / carers are informed as soon as possible.

All school staff who volunteer or who are contracted to administer medication are provided with training by a healthcare professional. The school keeps a register of staff who have had the relevant training.

Ladybridge keeps an up-to-date list of members of staff who have agreed to administer medication and have received the relevant training.

# Forms

The following forms are used to help Ladybridge implement a medical conditions policy. The forms are based on the DfES guidance Managing Medicines in Schools and Early Years Settings, and have been amended to incorporate advice and comments from school staff, parents /carers and organisations who represent children and young people with medical conditions.

## Form 1 – Healthcare Plan

Healthcare Plans are used to record important details about individual pupils' medical needs, their triggers, signs, symptoms, medication and other treatments. Healthcare Plans record details about the medication pupils take both in and outside school hours. They are also a convenient way to record permission from parents / carers and the head teacher at our school for medication to be administered by a member of staff, or self administered by individual pupils during school hours.

At Ladybridge we ensure that all parents / carers of pupils with a medical condition complete a plan at the beginning of each school year with the SENCo, the school nurse and parents / carers.

Plans are updated every year and whenever an individual pupil's condition or medical needs change.

Ladybridge finds Healthcare Plans helpful to:

Create and update a centralised register of pupils with medical conditions in our school.

Identify common or important individual triggers for pupils with medical conditions at our school to help us devise a trigger reduction schedule.

Ensure our local emergency care services have a timely and accurate summary of a pupil requiring emergency treatment.

Everyone who contributes to a pupil's plan, including the pupil's parents / carers and the school, keeps a copy.

**This care plan must be stored with each emergency kit in an easily accessible place.  
All staff should know where to locate the emergency kit and the care plan.**

## Form 2 – Template letter

Ladybridge adapts this template letter, as required, to accompany Healthcare Plans when they are sent to parents / carers of pupils with medical conditions.

Dear Parent / Carer

Re: The Healthcare Plan

Thank you for informing us of your child's medical condition. As part of accepted good practice and with advice from the Department for Children, Schools and Families, relevant voluntary organisations and the school's governing bodies, our school has recently established a new medical conditions policy for use by all staff.

As part of this policy, we are asking all parents / carers of children with a medical condition to help us by completing a school Healthcare Plan for their child/children. Please complete the plan, with the assistance of your child's healthcare professional, and return it to the school. If you would prefer to meet someone from the school to complete the Healthcare Plan or if you have any questions then please contact us on [insert school contact number]. Your child's completed plan will store helpful details about your child's medical condition, current medication, triggers, individual symptoms and emergency contact numbers. The plan will help school staff to better understand your child's individual condition. Please make sure the plan is regularly checked and updated and the school is kept informed about changes to your child's medical condition or medication. This includes any changes to how much medication they need to take and when they need to take it.

I look forward to receiving your child's Healthcare Plan.

Thank you for your help.

Yours sincerely  
Head teacher

## Form 3 – Medication permission and record: individual pupil

This form is used to record the administration of medication during school hours for individual pupils. It is an ideal way to record short-term courses of medication (e.g., antibiotics) that pupils may need to take during school hours.

Pupils' parents / carers are asked to fill in the information about their child and their child's medication on a separate form.

### Administering Medication – Consent Form

**Please note that school staff will only administer** medication prescribed by a doctor or advised by a medical professional **and upon completion of the following:**

**Medication must be brought into school and collected by a parent / carer.**

Child's Full Name: \_\_\_\_\_

Class: \_\_\_\_\_

Today's Date: \_\_\_\_\_

Medicine to be given: \_\_\_\_\_

Dosage: \_\_\_\_\_

Time to be given: \_\_\_\_\_

Parent/ Carer's Signature: \_\_\_\_\_

**Instructions/ Information:** (e.g. to be stored in the fridge, etc)

## Medication Administration Record

Child's Name:	Class:	Date:	Medication given:	Given by:	Time:	Parent / carer Signature

## Form 4 – Emergency inhaler use letter

### EMERGENCY SALBUTAMOL INHALER USE

Child's name: .....

Class: .....

Date: .....

Dear .....,

This letter is to formally notify you that.....has had problems with his / her breathing today at ..... and was given an emergency inhaler.

Number of puffs given .....

This happened when.....  
(Description of what child was doing at the time and where he/she was)

A member of staff helped them to use the asthma inhaler.

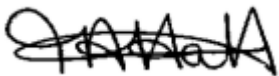

Additional information:

Give reason why the pupil's own or spare inhaler was not accessible.

.....

Although they soon felt better, we would strongly advise that you have your son / daughter seen by your own doctor as soon as possible.

Kind regards

Mrs Hall  
Deputy Head Teacher

## Form 5 – Consent for emergency Salbutamol inhaler use letter

For pupil's showing symptoms of asthma / having an asthma attack.

Child's name: ..... Class .....

1. I can confirm that my child has been diagnosed with asthma / has been prescribed an inhaler [delete as appropriate].
2. My child has a working, in-date inhaler, clearly labelled with their name, which is stored in school.
3. **In the event of my child displaying symptoms of asthma, and if their inhaler is not available or is unusable, I consent for my child to receive Salbutamol from an emergency inhaler held by the school for such emergencies.** (The inhaler will be administered via a 'spacer' and will be sanitised after each use)

Parent Signature; .....

Parent Name; (please print) .....

Date: .....

Parent address and contact details:

Parent's address .....  
.....

Parent's daytime Telephone number .....

Parent's daytime email address .....

# Appendices

## Legislation and guidance

Local authorities, schools and governing bodies are responsible for the health and safety of pupils in their care.

Areas of legislation that directly affect a medical conditions policy are described in more detail in Managing Medicines in Schools and Early Years Settings. The main pieces of legislation are the Disability Discrimination Act 1995 (DDA), amended by the Special Educational Needs and Disability Act 2001 (SENDA) and the Special Educational Needs and Disability Act 2005. These acts make it unlawful for service providers, including schools, to discriminate against disabled people. Other relevant legislation includes the Education Act 1996, the Care Standards Act 2000, the Health and Safety at Work Act 1974, the Management of Health and Safety at Work Regulations 1999 and the Medicines Act 1968.

This section outlines the main points from the relevant legislation and guidance that schools should consider when writing a medical conditions policy.

### **Managing Medicines in Schools and Early Years Settings (2004)**

This provides guidance from the DfES (now DCFS) and DH on managing medicines in schools and early years settings. The document includes the following chapters:

- \* developing medicines policies
- \* roles and responsibilities
- \* dealing with medicines safely
- \* drawing up a Healthcare Plan
- \* relevant forms.

Medical Conditions at School: A Policy Resource Pack is designed to work alongside Managing Medicines in Schools and Early Years Settings.

### **Disability Discrimination Act 1995 (DDA) and the Special Educational Needs and Disability Acts (2001 and 2005)**

Many pupils with medical conditions are protected by the DDA and SENDA, even if they don't think of themselves as 'disabled'.

The Commission for Equality and Human Rights (CEHR) (previously the Disability Rights Commission) publishes a code of practice for schools, which sets out the duties under the DDA and gives practical guidance on reasonable adjustments and accessibility. The CEHR offers information about who is protected by the DDA, schools' responsibilities and other specific issues.

Schools' responsibilities include:

- \* not to treat any pupil less favourably in any school activities without material and sustainable justification
- \* to make reasonable adjustments that cover all activities – this must take into consideration

factors such as financial constraints, health and safety requirements and the interests of other pupils. Examples of reasonable adjustments can be found in the DfES resource: Implementing the DDA in Schools and Early Years Settings\*

- \* to promote disability equality in line with the guidance provided by the DCSF and CEHR through the Disability Equality Scheme.

## **The Education Act 1996**

Section 312 of the Education Act covers children with special educational needs, the provisions that need to be made and the requirements local health services need to make to help a local authority carry out its duties.

## **The Care Standards Act 2000**

This act covers residential special schools and responsibilities for schools in handling medicines.

## **Health and Safety at Work Act 1974**

This act places duties on employers for the health and safety of their employees and anyone else on their premises. This covers the head teacher and teachers, non-teaching staff, pupils and visitors.

## **Management of Health and Safety at Work Regulations 1999**

These regulations require employers to carry out risk assessments, manage the risks identified and to communicate these risks and measures taken to employees.

## **Medicines Act 1968**

This act specifies the way that medicines are prescribed, supplied and administered
