			Maths				
Number – Number and Place Value	Number – Addition and subtraction	Number – Multiplication and division	Number – fractions	Measurement	Geometry – Properties of shape	Geometry – Position and direction	Statistics
Pupils should be taught to: count in steps of 2, 3, and 5 from 0, and in tens from any number, forward	Pupils should be taught to: solve problems with addition and subtraction: using concrete objects and pictorial	Pupils should be taught to: recall and use multiplication and division facts for the 2, 5 and 10 multiplication	Pupils should be taught to: recognise, find, name and write fractions $\frac{1}{3}$, $\frac{1}{4}$, $\frac{2}{4}$ and $\frac{3}{4}$ of a	Pupils should be taught to: choose and use appropriate standard units to estimate and measure	Pupils should be taught to: identify and describe the properties of 2-D shapes, including the number of	Pupils should be taught to: order and arrange combinations of mathematical objects in	Pupils should be taught to: Interpret and construct simple pictogram

and backward	representations,	tables, including	length, shape,	length/height in	sides and line	patterns and	s, tally
recognise the place value of each digit in a two-digit number (tens, ones) identify, represent and estimate numbers using different representations,	including those involving numbers, quantities and measures applying their increasing knowledge of mental and written methods recall and use addition	recognising odd and even numbers calculate mathematical statements for multiplication and division within the multiplication tables and write them using the multiplication (×),	set of objects or quantity write simple fractions for example, $\frac{1}{2}$ of $6 = 3$ and recognise the equivalence of $\frac{2}{4}$ and $\frac{1}{2}$.	any direction (m/cm); mass (kg/g); temperature (°C); capacity (litres/ml) to the nearest appropriate unit, using rulers, scales, thermometers and measuring	symmetry in a vertical line identify and describe the properties of 3-D shapes, including the number of edges, vertices and faces identify 2-D	sequences use mathematical vocabulary to describe position, direction and movement, including movement in a straight line and	charts, block diagrams and simple tables ask and answer simple questions by counting the
including the number line	and subtraction facts to 20 fluently, and derive and use related facts up	division (+) and equals (=) signs		vessels compare and	shapes on the surface of 3-D shapes [for	distinguishing between	number of objects in
compare and order numbers from 0 up to 100; use <, > and = signs read and write numbers to at least 100 in numerals and in words use place value and number facts to solve	to 100 add and subtract numbers using concrete objects, pictorial representations, and mentally, including: a two-digit number and ones a two-digit number and tens	show that multiplication of two numbers can be done in any order (commutative) and division of one number by another cannot solve problems involving multiplication and division,		order lengths, mass, volume/capacity and record the results using >, < and = recognise and use symbols for pounds (£) and pence (p); combine amounts to make a particular value	example, a circle on a cylinder and a triangle on a pyramid] compare and sort common 2-D and 3-D shapes and everyday objects.	rotation as a turn and in terms of right angles for quarter, half and three- quarter turns (clockwise and anti-clockwise).	each category and sorting the categories by quantity ask and answer questions about totalling and comparing
problems.	two two-digit numbers adding three one-digit numbers show that addition of two numbers can be done in any order (commutative) and subtraction of one	using materials, arrays, repeated addition, mental methods, and multiplication and division facts, including problems in contexts.		 find different combinations of coins that equal the same amounts of money solve simple problems in a practical context involving addition 			categorical data.

number from another cannot recognise and use the inverse relationship between addition and subtraction and use this to check calculations and solve missing number problems.	and subtraction of money of the same unit, including giving change compare and sequence intervals of time tell and write the time to five minutes, including quarter past/to the hour and draw the hands on a clock face to show these times know the number of minutes in an hour and the number of hours in a day.

	Science							
Working Scientifically	Living Things and their	Plants	Animals, inc Humans	Use of everyday materials				
	habitats							
During years 1 and 2, pupils should be taught to use the following practical scientific methods, processes and skills through the teaching of the programme of study content: - asking simple questions and recognising that they can be answered in different ways - observing closely, using simple	Pupils should be taught to: explore and compare the differences between things that are living, dead, and things that have never been alive identify that most living things live in habitats to which they are suited and describe how different habitats provide for the	Pupils should be taught to: observe and describe how seeds and bulbs grow into mature plants find out and describe how plants need water, light and a suitable temperature to grow and stay healthy.	Pupils should be taught to: notice that animals, including humans, have offspring which grow into adults find out about and describe the basic needs of animals, including humans, for survival (water, food and air)	Pupils should be taught to: identify and compare the suitability of a variety of everyday materials, including wood, metal, plastic, glass, brick, rock, paper and cardboard for particular uses find out how the shapes of solid objects made from some				

equipment	basic needs of different kinds of	 describe the importance for 	materials can be changed by

ideas to suggest answers to	habitats, including micro-		
questions	habitats		
 gathering and recording data to help in answering questions. 	describe how animals obtain their food from plants and other animals, using the idea of a simple food chain, and identify and name different sources of food.		

Non-Core Subjects							
Art & Design	Computing	Design & Technology	Geography	History	Music	PE	
to use a range of materials creatively to design and make products to use drawing, painting and sculpture to develop and share their ideas, experiences and imagination to develop a wide range of art and design techniques in using colour, pattern, texture, line, shape, form and space about the work of a range of artists, craft makers and designers, describing the differences and similarities between different practices and disciplines, and making links to their own work.	Pupils should be taught to: understand what algorithms are; how they are implemented as programs on digital devices; and that programs execute by following precise and unambiguous instructions create and debug simple programs use logical reasoning to predict the behaviour of simple programs use technology purposefully to create, organise, store, manipulate and retrieve digital content recognise common uses of information technology beyond school use technology safely and respectfully, keeping personal information private; identify where to go	Through a variety of creative and practical activities, pupils should be taught the knowledge, understanding and skills needed to engage in an iterative process of designing and making. They should work in a range of relevant contexts [for example, the home and school, gardens and playgrounds, the local community, industry and the wider environment]. When designing and making, pupils should be taught to: **Design** design purposeful, functional, appealing products for themselves and other users based on design criteria generate, develop, model and communicate their ideas through talking, drawing, templates, mockups and, where appropriate, information and communication technology	Pupils should be taught to: Locational knowledge name and locate the world's seven continents and five oceans name, locate and identify characteristics of the four countries and capital cities of the United Kingdom and its surrounding seas Place knowledge understand geographical similarities and differences through studying the human and physical geography of a small area of the United Kingdom, and of a small area in a contrasting non-European country Human and physical geography identify seasonal and daily weather patterns in the United Kingdom and the location of hot and cold areas of the	Pupils should be taught about: changes within living memory. Where appropriate, these should be used to reveal aspects of change in national life events beyond living memory that are significant nationally or globally [for example, the Great Fire of London, the first aeroplane flight or events commemorated through festivals or anniversaries] the lives of significant individuals in the past who have contributed to national and international achievements. Some should be used to compare aspects of life in different periods [for example, Elizabeth I and Queen Victoria,	Pupils should be taught to: use their voices expressively and creatively by singing songs and speaking chants and rhymes play tuned and untuned instruments musically listen with concentration and understanding to a range of high- quality live and recorded music experiment with, create, select and combine sounds using the inter- related dimensions of music.	Pupils should be taught to: master basic movements including running, jumping, throwing and catching, as well as developing balance, agility and co-ordination, and begin to apply these in a range of activities participate in team games, developing simple tactics for attacking and defending perform dances using simple movement patterns.
