### ACHIEVEMENT KS4:

In previous academic years we have included within this document an analysis of academic and vocational points achieved but, as these are no longer considered to be equitable measures of achievement we have discontinued this approach. The achievement matrices below detail the number of year 11 students that we have worked with and provide details of their level of achievement in each subject area. This information is based on the establishment of an accurate baseline and the achievement of students in both GCSE, Functional & BTEC examinations. We do

collect this data at an individual student level and this informed the information provided on these matrices.
