

## **Maths Intent**

At Linden Road Academy, we strive to create a love and passion for maths. Our curriculum is carefully planned to ensure coverage is balanced, structured and allows for deep learning. We use White Rose as our curriculum spine, and supplement this with additional resources when necessary. Our long-term curriculum plans ensure that time allows for topics to be revisited throughout the year, giving opportunity for pupils to revisit and build on their learning. Our lessons are planned through five main domains: Variation, Fluency, Mathematical Thinking, Representation and Coherency. We use pedagogy developed in Shanghai to structure our 'small steps' lesson design. We believe that by working alongside pupils, teaching staff are able to guide pupils through 'small steps' of structured progress within a lesson. Whole class teaching is carefully differentiated through targeted questioning and different levels of support structures. Pupils will often work reciprocally, enhancing their reasoning skills as they support their peers.

All maths lessons explore elements of reasoning and problem solving, which provide fantastic opportunities for our pupils to use their Growth Mindset and resilience skills. Teachers model and encourage verbal reasoning with peers and pupils evaluate mathematical strategies, debating their efficiency.

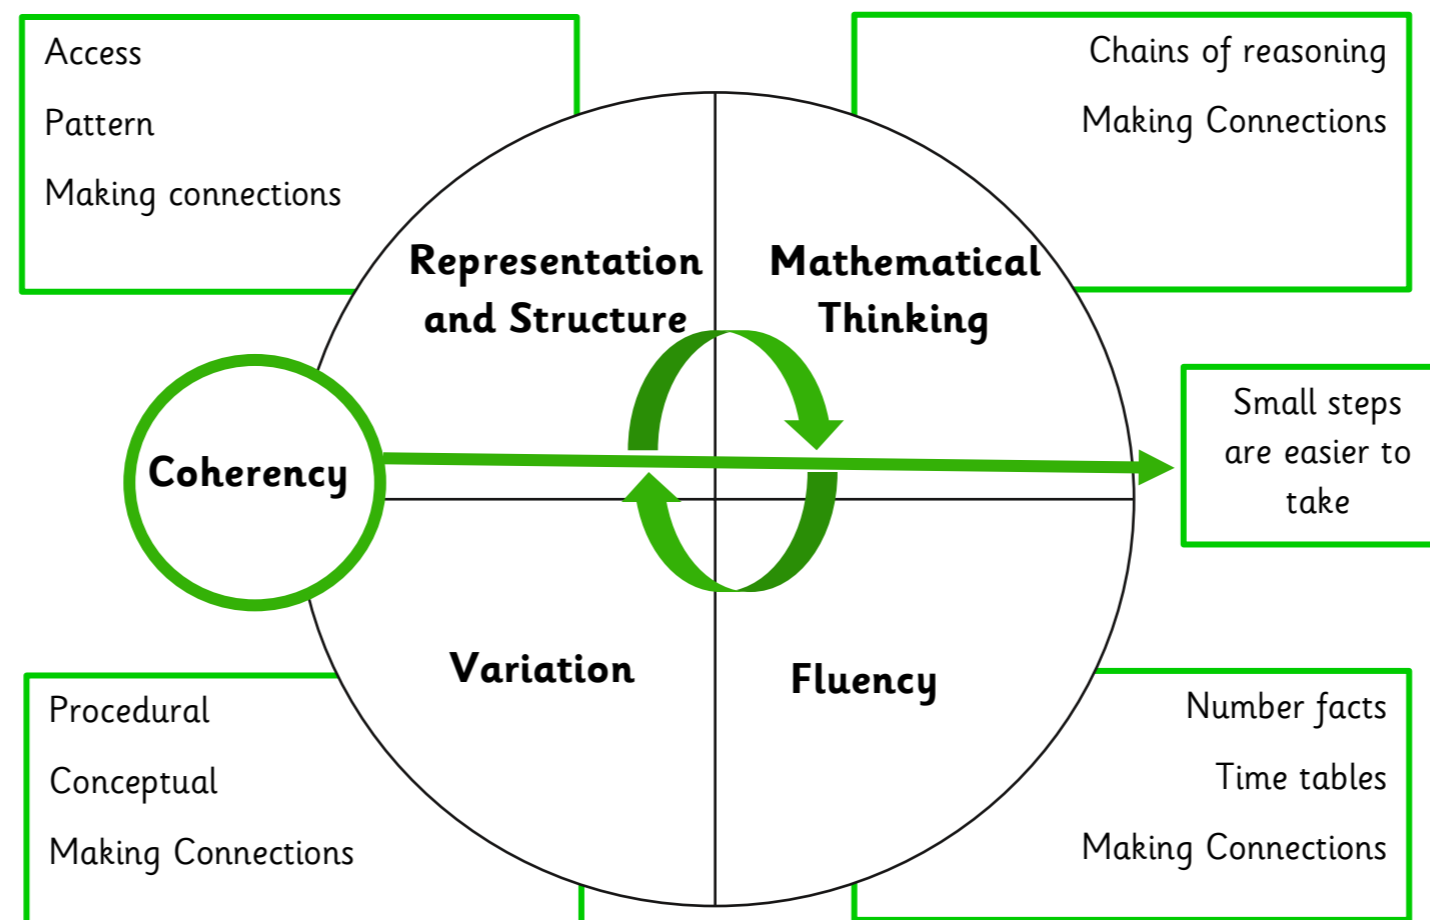

Teaching teams explicitly model the declarative and procedural knowledge that supports children in their learning. This is displayed on Maths Working Walls in classrooms to support the children whilst working.

The fantastic resources created by the NCETM are used at Linden Road to ensure our pupils develop a strong understanding of Number and Place Value. The Mastering Early Number Programme is used as an intervention for those pupils in EYFS who need more support in their number sense. Whilst in Year 1, it is used in the Autumn term to ensure that pupils have the Early Number skills needed before they move on to more challenging content.

Fluency skills are developed through arithmetic sessions at the beginning of maths lessons over the course of a week. We have adopted pedagogy developed by Ron Berger in 'Leaders of Our Own Learning' by asking pupils to track their own arithmetic progress and subsequently, set themselves aspirational goals. Our pupils work together to close their gaps in arithmetic progress, learning from their peers in order to succeed. During the Summer Term, teachers use the Ready to Progress Criteria from the NCETM to create their Arithmetic fluency sheets – these ensure that pupils are secure in the elements of maths they need before moving up to the next year group.

To complement our fluency skills, pupils also engage in RRR (Recap, Remember, Retain) which allows for opportunity to revisit prior learning, and thus, commit learning into long-term memory. These sessions focus on pupils revisiting learning from their last topic, last term and last year.

SumDog is an additional tool used across school to improve pupils' fluency through the use of it's digital App. Pupils enjoy using the app to compete with peers both within school and at home too.

## Maths Whole School Progression

### Mathematical Vocabulary - Communication and Language - Speaking

FS1

FS2

ELG Speaking

Use a wider range of vocabulary

Understand 'why' questions, like: 'why do you think the caterpillar is so fat?'

Learn new vocabulary

Use new vocabulary throughout the day

Participate in small group, class and one-to-one discussions, offering their own ideas, using recently introduced vocabulary

| Area of maths<br>Place Value   | <u>EYFS</u>   | <u>Year 1</u>  | <u>Year 2</u>   | <u>Year 3</u>  | <u>Year 4</u>  | <u>Year 5</u>  | <u>Year 6</u> |
|--|---|--|---|--|--|--|---------------|
| <p>FS1</p> <p>Recite numbers past 5.</p> <p>Say one number name for each item in order: 1, 2, 3, 4, 5.</p> <p>Know that the last number reached when counting a small set of objects tells you how many there are in total ('cardinal principle').</p> <p>Develop fast recognition of up to 3 objects, without having to count them individually ('subitising').</p> <p>Show 'finger numbers' up to 5.</p> <p>Link numerals and amounts: for example, showing the right number of objects to match the numeral, up to 5.</p> <p>Experiment with their own symbols and marks as well as numerals.</p> <p>Compare quantities using language: 'more than', 'fewer than'.</p> <p>Solve real world mathematical problems with numbers up to 5</p> <p>Experiment with their own symbols and marks as well as numerals.</p> <p>FS2</p> <p>Count objects, actions and sounds.</p> <p>Count beyond ten.</p> <p>Subitise.</p> <p>Link the number symbol (numeral) with its cardinal number value.</p> <p>Compare numbers.</p> <p>Understand the 'one more than/one less than' relationship between consecutive numbers.</p> <p>Explore the composition of numbers to 10.</p> <p>Link the number symbol (numeral) with its cardinal number value.</p> <p>ELG</p> <p>Verbally count beyond 20, recognising the pattern of the counting system.</p> <p>Subitise (recognising quantities without counting) up to 5.</p> <p>Compare quantities up to 10 in different contexts, recognising when one quantity is greater than, less than or the same as the other quantity.</p> <p>Have a deep understanding of numbers to 10, including the composition of each number.</p> | <p>Given a number, identify one more or one less.</p> <p>Identify and represent numbers using objects and pictorial representations including the number line, and use the language of: equal to, more than, less than (fewer), most, least.</p> <p>Count to ten, forwards and backwards, beginning with 0 or 1, or from any given number.</p> <p>Count, read and write numbers to 10 in numerals and words.</p> <p>Count to twenty, forwards and backwards, beginning with 0 or 1, from any given number.</p> <p>Count, read and write numbers to 20 in numerals and words.</p> <p>Count to 50 forwards and backwards, beginning with 0 or 1, or from any number.</p> <p>Count, read and write numbers to 50 in numerals.</p> <p>Count in multiples of twos, fives and tens.</p> <p>Count to and across 100, forwards and backwards, beginning with 0 or 1, or from any given number.</p> <p>Count, read and write numbers to 100 in numerals.</p> | <p>Read and write numbers to at least 100 in numerals and in words.</p> <p>Recognise the place value of each digit in a two digit number (tens, ones)</p> <p>Identify, represent and estimate numbers using different representations including the number line.</p> <p>Compare and order numbers from 0 up to 100; use <math>&lt;</math>, <math>=</math> and <math>&gt;</math> signs.</p> <p>Use place value and number facts to solve problems.</p> <p>Count in steps of 2, 3 and 5 from 0, and in tens from any number, forward and backward.</p> | <p>Identify, represent and estimate numbers using different representations.</p> <p>Find 10 or 100 more or less than a given number</p> <p>Recognise the place value of each digit in a three-digit number (hundreds, tens, ones).</p> <p>Compare and order numbers up to 1000</p> <p>Read and write numbers up to 1000 in numerals and in words.</p> <p>Solve number problems and practical problems involving these ideas.</p> <p>Count from 0 in multiples of 4, 8, 50 and 100</p> | <p>Count in multiples of 6, 7, 9, 25 and 1000.</p> <p>Find 1000 more or less than a given number.</p> <p>Recognise the place value of each digit in a four digit number (thousands, hundreds, tens and ones)</p> <p>Order and compare numbers beyond 1000</p> <p>Identify, represent and estimate numbers using different representations.</p> <p>Round any number to the nearest 10, 100 or 1000</p> <p>Solve number and practical problems that involve all of the above and with increasingly large positive numbers.</p> <p>Count backwards through zero to include negative numbers.</p> <p>Read Roman numerals to 100 (I to C) and know that over time, the numeral system changed to include the concept of zero and place value.</p> | <p>Read, write, order and compare numbers to at least 1000000 and determine the value of each digit.</p> <p>Count forwards or backwards in steps of powers of 10 for any given number up to 1000000.</p> <p>Interpret negative numbers in context, count forwards and backwards with positive and negative whole numbers including through zero.</p> <p>Round any number up to 1000000 to the nearest 10, 100, 1000, 10000 and 100000</p> <p>Solve number problems and practical problems that involve all of the above.</p> <p>Read Roman numerals to 1000 (M) and recognise years written in Roman numerals.</p> | <p>Read, write, order and compare numbers up to 10,000,000 and determine the value of each digit.</p> <p>Round any whole number to a required degree of accuracy.</p> <p>Use negative numbers in context, and calculate intervals across zero.</p> <p>Solve number and practical problems that involve all of the above.</p> |               |

|  |   |   |   |  |   |  |   |

|------------------------------------|---|---|---|---|---|---|---|
| <p><b>Algebra</b></p>              | <p>FS1<br/>Begin to represent numbers with objects</p> <p>Talk about and identify the patterns around them. For example, stripes on clothes, designs on rugs and wallpaper. Use informal language like 'pointy', 'spotty', 'blobs', etc. Extend and create ABAB patterns – stick, leaf, stick, leaf. Notice and correct an error in a repeating pattern.</p> <p>FS2<br/>Begin to understand the mathematical symbols</p> <p>Continue, copy and create repeating patterns.</p> | <p>Begin to solve simple problems with an object or shape representing a missing number</p>             | <p>Solve addition and subtraction equations involving shapes and objects representing missing numbers</p>   | <p>Solve equations involving all four operations with shapes and objects representing missing numbers</p>   | <p>Solve more complex equations involving all four operations with shapes and objects representing missing numbers</p>  | <p>Solve a range missing number problems and reasoning problems algebraically.</p>  | <p>Use simple formulae<br/>Generate and describe linear number sequences.</p> <p>Express missing number problems algebraically. Find pairs of numbers that satisfy an equation with two unknowns.</p> <p>Enumerate possibilities of combinations of two variables.</p>  |
| <p><b>Statistics and ratio</b></p> | <p>FS1<br/>Experiment with their own symbols and marks, as well as numerals.</p> <p>FS2<br/>Use pictorial representations to count – I.e. tally of favourite things</p> <p>Draw information from a simple map.</p>  | <p>Introduce how pictograms and other graphs can be used as a way of representing different numbers</p> | <p>Interpret and construct simple pictograms, tally charts, block diagrams and simple tables.</p> <p>Ask and answer simple questions by counting the number of objects in each category and sorting the categories by quantity.</p> <p>Ask and answer questions about totalling and comparing categorical data.</p> | <p>Interpret and present data using bar charts, pictograms and tables.</p> <p>Solve one-step and two-step questions [for example, 'How many more?' and 'How many fewer?'] using information presented in scaled bar charts and pictograms and tables.</p> | <p>Interpret and present discrete and continuous data using appropriate graphical methods, including bar charts and time graphs.</p> <p>Solve comparison, sum and difference problems using information presented in bar charts, pictograms, tables and other graphs.</p> | <p>Solve comparison, sum and difference problems using information presented in a line graph.</p> <p>Complete, read and interpret information in tables including timetables.</p> <p>Consider how to calculate ratio when completing tables and grids with missing values</p> | <p>Illustrate and name parts of circles, including radius, diameter and circumference and know that the diameter is twice the radius.</p> <p>Interpret and construct pie charts and line graphs and use these to solve problems. Calculate the mean as an average</p> <p>Solve problems involving the relative sizes of two quantities where missing values can be found by using integer multiplication and division facts.</p> <p>Solve problems involving similar shapes where the scale factor is known or can be found.</p> <p>Solve problems involving unequal sharing and grouping using knowledge of fractions and multiples.</p> |
