

Design and Technology

Content that *could* be assessed:

All sections of the non-exam assessment (NEA) up to and including 'Developing design ideas' will remain the same for 2021

Content that *will not* be assessed:

The making of the final prototype

The assessment no longer requires students to make a final prototype - instead, they can show their understanding of the processes involved in making by writing about them. However, making skills are important for progression to future study, and for students understanding, so we'd encourage you to continue to allow students to make wherever possible. This is one way of demonstrating the knowledge tested in the 2021 'Realising design ideas' section and is the best way to inspire and enthuse students in the subject.
