

How to Access GCSE Pod

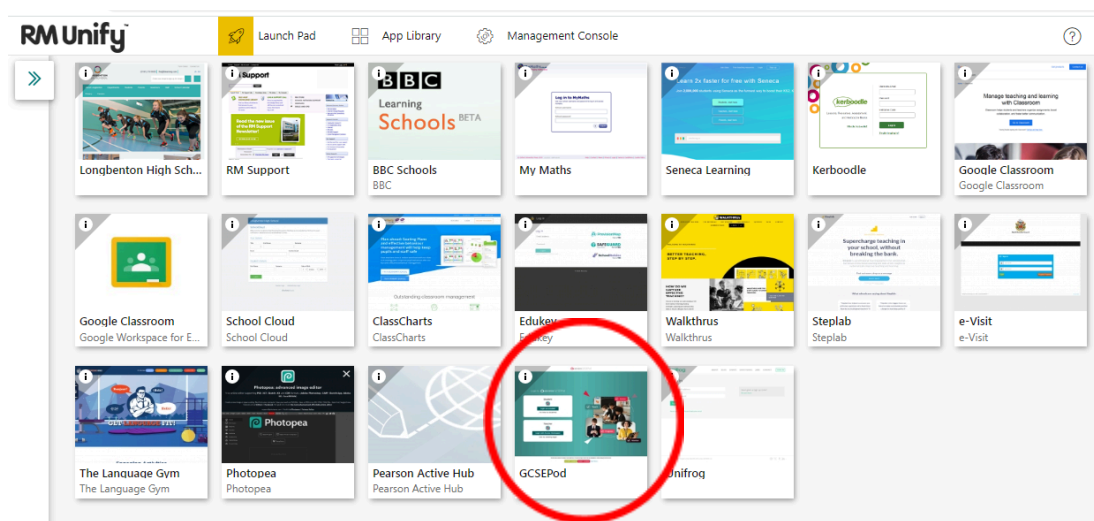

We are getting a great deal of interest in our new online home learning platform, GCSE Pod, from students and families. As such, we wanted to share some basic details with you to show you how straightforward it is for students to access the site and to learn independently.

The best way to use GCSE Pod is to access it via the school landing page which can be found via rmunify.com

Students then type in their log in details and will be directed to this page:

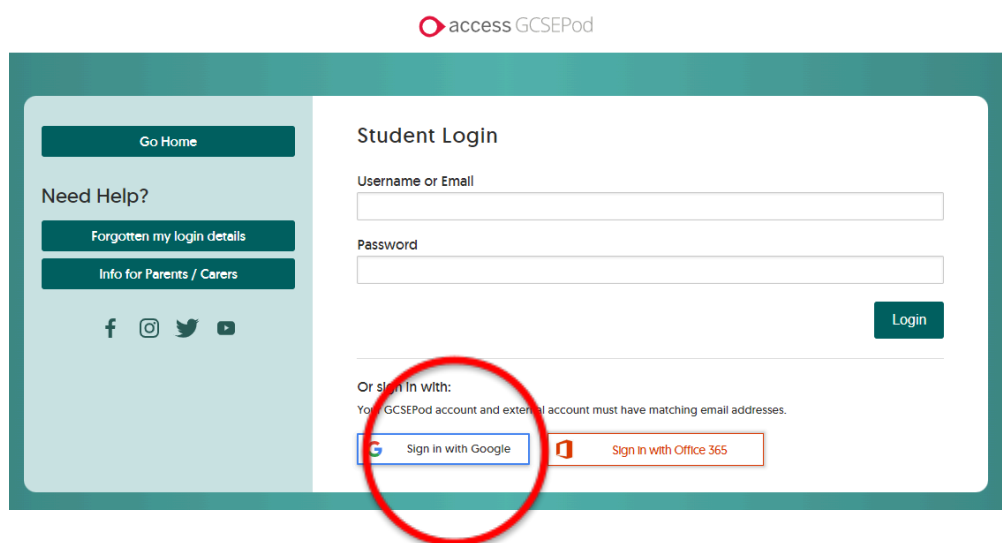

Scroll down until you see this 'tile':

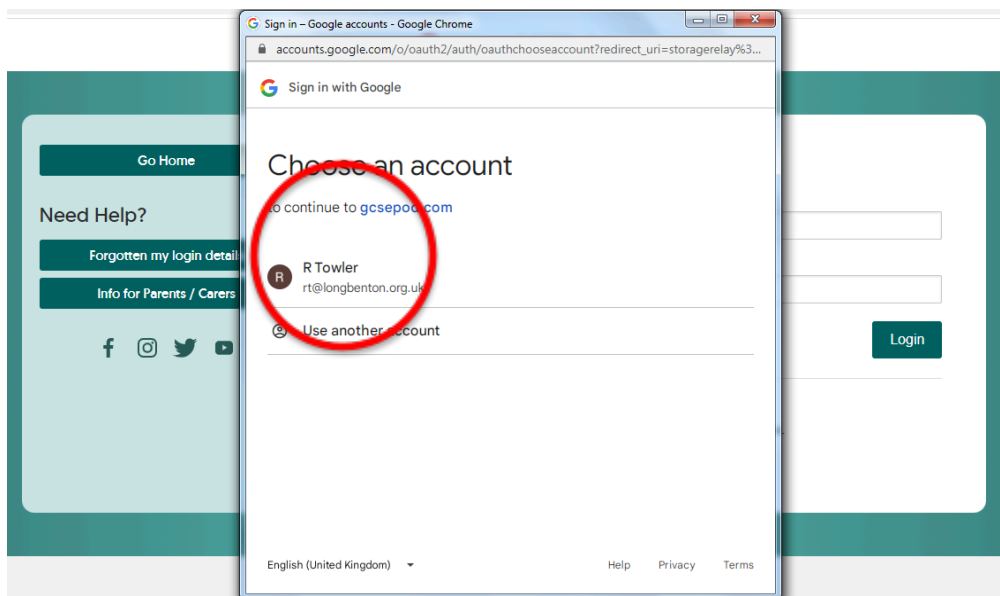

When you click on this tile it will take you to the following page where you can then click on 'login as student':

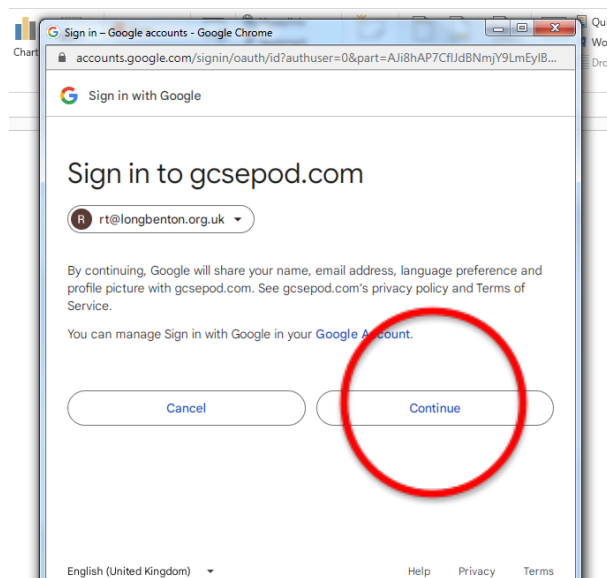

From here you can then click on 'Sign in with Google':

The next step is to click on the student name (students might be asked to enter their school email address at this stage):

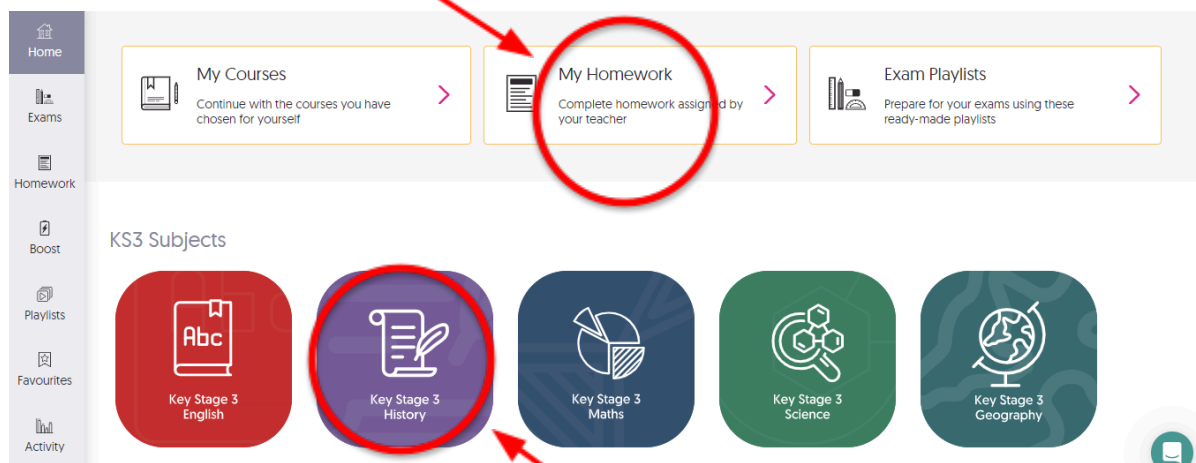

You then click on 'Continue':

Students might be prompted to enter their registration details into GCSE Pod at this stage if they have not previously logged into GCSE Pod

Students will then be at the GCSE Pod home page where they can see their homework/assignments button, showing them what work they have set or have been set previously

Students can also use the subject tiles to navigate the site and watch any 'pods' or do any 'check and challenge' tasks of their choice

Please email Mr Towler (rt@longbenton.org.uk) if you need any further assistance accessing GCSE Pod
