# HISTORY: YEAR 9 MILLIE MEADOWS

## NOMINATED BY: MR HAROLD

### Choosing a king:

In the 11<sup>th</sup> century the Normans introduced the concept of primogeniture. This meant if the king died, the eldest son would inherit all of their father's land and title. The idea of this could still be disputed since it was not a rule English had always followed.

### Sensing a claim to the throne

A medieval king would sense their throne through a coronation, this ceremony would reveal to the king public who the new king was. He would swear an oath, at this event the king would be crowned. The everyday medieval person would not question the new ruler as there was a belief he had been chosen by God, so if they did question there was a fear they'd go to hell.

MILLIE HAS SHOWN FANTASTIC EFFORT AND PROGRESS IN HISTORY THIS YEAR. MILLIE HAS BEEN ABLE TO CREATE SEVERAL DETAILED PROFILES OF KEY HISTORICAL FIGURES WHICH SHE WILL BE ABLE TO RECALL WHEN STUDYING HER GCSE IN KS4.

MILLIE HAS BEEN ABLE TO PROVIDE DETAILED DESCRIPTIONS AND EXPLANATIONS WITHIN HER WRITTEN WORK. MILLIE UNDERSTANDS COMMON COMMAND WORDS THAT APPEAR IN HISTORY LESSONS. FOR EXAMPLE, MILLIE CLEARLY UNDERSTANDS THE MEANING OF EVENTS WHICH ARE DESCRIBED AS 'SIGNIFICANT'.

WELL DONE MILLIE ON ANOTHER BRILLIANT YEAR.

### Why was 1189 significant?

- Henry 2<sup>nd</sup> died
- Richard was heir to the throne
- He (Richard) sent word to England that his mother was a free woman

## Mexico!

### Flag

The Mexican flag's meaning and colour has changed over time but ever since independence it has been red white and green which are also the Mexican army's colours. The green represents hope and the red, blood of national heroes. The white is for unity and the coat of arms represents the legend of how the Aztecs chose the site for their capital city.

### Geography

Mexico is in the southern portion of North America. It is bordered north by the United States, to the southwest by the Pacific Ocean, to the southeast by Guatemala and Belize and the Caribbean Sea. It covers 1,972,550 square kilometres and has approximately 128,649,565 people living there. Its capital city is Mexico City.

### History

Its origins are traced back to 8000bc where it was home to many advanced civilizations like the Maya and Aztecs. In 1521, the Spanish empire conquered the territory from its base in Mexico

City, which then became known as the New Spain. Mexico then became an independent nation after the successful Mexican War of Independence against Spain in 1821.

### Known for today

Something Mexico is known for worldwide is food. Foods that originated in Mexico include avocados, chocolate and pumpkins. Fizzy drinks are also very popular and the country has a well-developed beverage industry. Mexico is also known for Mayan Temples, beach destinations like Cancun and its elaborate festivals like Day of the Dead.
