

YEAR 8

Independent learning to be completed during school closure

GEOGRAPHY

Work for 22nd June-3rd July

GLOBAL CLIMATE CHANGE

Many people and scientists are concerned about the fact the world's climate is changing. Some of the changes will be positive but many of them will be very negative depending on where you live

Task 1

- What is the main evidence to suggest that global warming is taking place in the world today?
- You need to find about 4-5 ways in which the world is changing
- Try to use key facts and figures, graphs, maps and images to help show how the world is changing.

Task 2

- Explain what is meant by global warming and 'enhanced' global warming
- What are the main causes of global warming?
- Try to use key facts and figures, graphs, maps and images to help show the causes.

You can produce a report, powerpoint or display to complete the tasks above. Make sure it has images, graphs, maps and key facts and figures

GLOBAL WARMING WEBSITES

There are thousands and thousands of websites on global warming.

The following is a list of websites that you may find useful in helping you research materials for your presentation.

www.education.noaa.gov/

www.RoyalSoc.ac.uk

www.direct.gov.uk/ActOnCO2

www.en.wikipedia.org/wiki/Global_warming

www.epa.gov/globalwarming/kids/gw.html

www.timeforchange.org/cause-and-effect-for-global-warming

Or just type into the google search 'global warming evidence' or 'global warming causes' you might want to add the words 'key stage 3' so you can get sites that you will be able to understand.
