

YEAR 8

Independent learning to be completed during school closure

GEOGRAPHY

Work for 8th-19th June TROPICAL RAINFOREST PROTECTION

You have now completed the work on the importance of the rainforests and the main threats causing the destruction of the forests.

TASK 1

Produce a report/powerpoint/mindmap on the following;

- Describe the ways in which the rainforests are being protected e.g. Treaties/sustainable forestry/enforcement/conservation organisations
- Try to use a range of protection measures from different parts of the world where the forests are being protected
- What are some of the main problems with trying to protect the rainforests

There are many YouTube clips and websites that will help you with your research. Try to include maps, graphs, images/photos in your report.

TASK 2

Produce a report/powerpoint/mindmap on the following;

- Of all of the methods used to try to protect the rainforests, which do you think are the most successful and why?
- Which methods do you think will be hard to implement and why?

Now you have learned about how people are trying to protect the rainforests, complete the task below;

TASK 3

- Produce a poster to help people understand why the rainforests need protecting.
- Try to make it colourful, informative with pictures/images/drawings
- Try not to add too many words
- Use your **IMAGINATION** to try to influence people to help save the rainforests
