

Dear year 6

I'm just about to finish year 7 and I will be in year 8 when you are in year 7. When you just come in to the school it will look quite big, but it's small. If you think you won't be able to make friends, it is easier than you think.

If you like sports or activities after school, you can try out for school teams such as the football team and the cricket team.

If you bike it to school, then there is a big bike shed you could lock your bike up in and that is good for exercise.

Dear year 6

Year 7 is nothing to be worried about. I must say year 7 is quite enjoyable. I'll be in year 8 when you move to year 7 and this year has gone by extremely fast. It feels like I just joined year 7 yesterday. I came with a lot of people from primary school, but I have made friends with people I met just this year.

Finding my new classes for high school was difficult at first, but within the first 2 weeks I knew my way around the place.

Making new friends is probably the most exciting part of year 7. When I first joined I didn't know that many people but now I've made many friends.

"I was nervous when I started Year 7 and I came here with only one friend but after a while I made multiple friends."

"In my own opinion I would say year seven is the most fun year."

I feel like I belong at this school."

"The food at break and lunchtime is some of the best food I have ever had as there is a massive variety of choices."

"There will be a lot of extra curricular activity such as football, basketball all the way to chess club and everything between."
