

Proportional Reasoning

A collection of 9-1 Maths GCSE Sample and Specimen questions from AQA, OCR, Pearson-Edexcel and WJEC Eduqas.

Name:	
Total Marks:	

1. Sam and two friends put letters in envelopes on Monday.

The three of them take two hours to put 600 letters in envelopes.

(a) On Tuesday Sam has three friends helping.

Working at the same rate, how many letters should the four of them be able to put in envelopes in two hours?

(a) [2]

(b) Working at the same rate, how much longer would it take four people to put 1000 letters in envelopes than it would take five people?

(b) [4]

(c) Sam says

It took two hours for three people to put 600 letters in envelopes. If I assume they work all day, then in one day three people will put 7200 letters in envelopes because

$$600 \times 12 = 7200.$$

Why is Sam's assumption not reasonable?

What effect has Sam's assumption had on her answer?

[2]

2. The total weight of 3 tins of beans and 4 jars of jam is 2080 g.

The total weight of 5 tins of beans is 2000 g.

Work out the weight of 1 tin of beans and the weight of 1 jar of jam.

tin of beans..... g

jar of jam..... g

[4]

3. A and B are two companies.

	Company A		Company B	
	Sales (£ millions)	Number of workers	Sales (£ millions)	Number of workers
2004	320	2960	48	605
2014	388	3200	57	640

The table shows some information about the sales of each company and the number of workers for each company in 2004 and in 2014

Which company had the most sales per worker in 2014, Company A or Company B?

You must show how you get your answer.

[3]

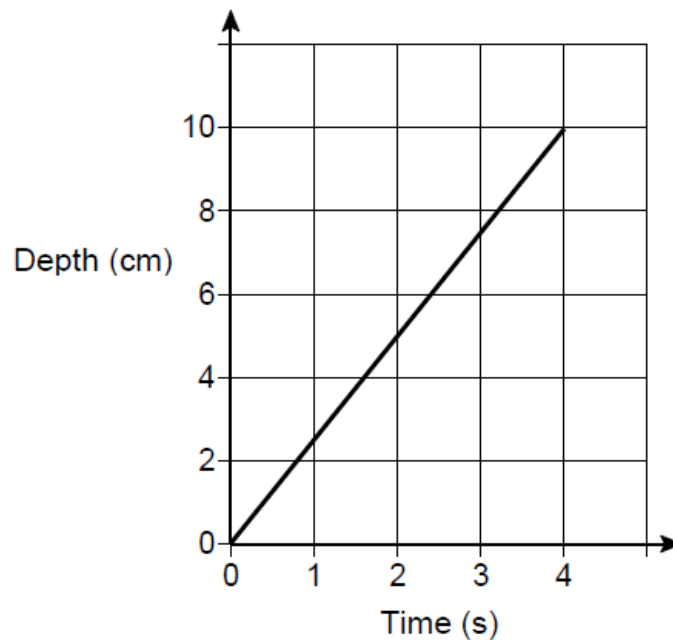

4. Water flows through a pipe at a rate of 20 gallons per minute.
 1 gallon = 4.55 litres.
 Change 20 gallons per minute to litres per second.
 Give your answer correct to 3 significant figures.

..... litres per second
 [2]

5. The mass of 40 cm³ of copper is 356 grams.
 Work out the mass of 90 cm³ of copper.

_____ grams [2]

6. Water is poured into a glass for 4 seconds.
 The graph shows the depth of the water in the glass.

What is the rate of change of the depth of the water?

Circle your answer.

- 0.4 cm/s 1.25 cm/s 2.5 cm/s 10 cm/s

[1]

7. A building company used 24 workers to prepare a building site.

The site measured 30 acres and the work was completed in 10 days.

(a) The company is asked to prepare another site measuring 45 acres.

This work has to be completed in 15 days.

Calculate the least number of workers the company should employ for this work.

[3]

(b) State one assumption you have made in your answer to part (a).

How would your answer to part (a) change if you did not make this assumption?

[2]

8. A team of examiners has 48 000 examination papers to mark.

It takes each examiner 1 hour to mark approximately 16 papers.

(a) The chief examiner says that a team of 25 examiners could mark all 48 000 papers in 8 days.

What assumption has the chief examiner made?

You must show all your calculations to support your answer.

[4]

(b) Why is the chief examiner's assumption unrealistic?

What effect will this have on the number of days the marking will take?

[2]

9. There are 5 grams of fibre in every 100 grams of bread.

A loaf of bread has a weight of 400 g.

There are 10 slices of bread in a loaf.

Each slice of bread has the same weight.

Work out the weight of fibre in one slice of bread.

[3]

Notes:

These questions have been retyped from the original sample/specimen assessment materials and whilst every effort has been made to ensure there are no errors, any that do appear are mine and not the exam board s (similarly any errors I have corrected from the originals are also my corrections and not theirs!).

Please also note that the layout in terms of fonts, answer lines and space given to each question does not reflect the actual papers to save space.

These questions have been collated by me as the basis for a GCSE working party set up by the GLOW maths hub - if you want to get involved please get in touch. The objective is to provide support to fellow teachers and to give you a flavour of how different topics "could" be examined. They should not be used to form a decision as to which board to use. There is no guarantee that a topic will or won't appear in the "live" papers from a specific exam board or that examination of a topic will be as shown in these questions.
