SET 7 Science please go to normal lessons.

Your Year 11 mock examinations begin on **Monday 2 November**, so now is the time to make your revision count.

The most important thing you can do is create a **structured revision timetable**. Make it visual, put it somewhere you will see it every day, and—most importantly—**stick to it**. It can be tempting to spend lots of time revising your favourite subjects or topics you already feel confident with but challenge yourself to spend time on the subjects and topics you find more difficult. That is where your revision can make the biggest difference.

Try to complete **as many exam questions as possible**. Get used to the wording of questions, practise applying what you know, and check your answers carefully.

Pay close attention to **how many marks each question is worth**. Your answer should reflect the number of marks available. If a question is worth 6 marks, make sure you provide enough detail and explanation to demonstrate your knowledge fully.

Arbor will have access to revision materials, so make sure you use them. Your teachers have provided resources to help you prepare, so take advantage of everything that is available to you.

Remember, **revision is not about cramming everything in at the last minute**. Give yourself enough time to prepare properly.

- Find a quiet place where you can concentrate.
- Take regular breaks.
- Keep yourself hydrated and have healthy refreshments.
- Make sure you get enough sleep.
- Give yourself time away from your studies too.

You have the **resilience, ability and potential to achieve the grades you are capable of**. But remember that success requires **dedication, practice and effort** on your part. Your mocks are an opportunity to show yourself what you can do, identify what you need to work on, and prepare for the final examinations.

You can do this. Believe in yourself, put in the effort, and give it your best.
