

School Evaluation Narrative

The 2025/2026 Sixth Form cohort achieved strong outcomes, with all students successfully progressing to appropriate post-school destinations. Half of the cohort moved into further education at Lakes College, with every student achieving ASDAN PDP Gold prior to transition. This demonstrates the effectiveness of the Sixth Form curriculum in preparing students for continued learning and employment-related pathways.

The remaining students progressed into specialist adult provision, day services and continuing care placements that were carefully matched to their individual aspirations, needs and long-term outcomes. Achievement across ASDAN programmes reflects a personalised curriculum approach, ensuring success for students across a broad range of abilities and support needs.

Overall, the cohort demonstrates excellent preparation for adulthood outcomes, with evidence of successful progression in education, independence, communication, personal development and community participation.
