# Photography Checklist For Taking Photographs!

- Make sure your images are not blurry.
- Make sure you have taken the picture either vertically or horizontally (not wonky).
- Have you considered the rule of thirds in your images?
- Is the lighting balanced (not too dark or too bright)?
- Have you taken a range of viewpoints? (Bird's eye, worm's eye, neutral, symmetrical.)
- Have you considered the formal elements? (Focus, Light, Line, Repetition, shape, texture, space, value)
- Are you images in focus? (Have you used aperture/ depth of field)
- Have you taken a range of photographs including any close up images to show texture and shape?
- Make sure you upload your photographs to your PowerPoint and saved in SharePoint.
