

Top Tips for creating an Artist/Photographer Page

1. Include a colour copy of each image being discussed
2. Make sure the copies are big enough to see clearly and talk about
3. Use specialist photography/art terminology and key words (see Photography Keyword pages)
4. Break your writing down into small sections and separate each topic
5. Do not copy and paste directly from the internet—this will earn you NO marks as it does not show your own understanding!
6. Your own opinion and ideas about the work are most important!!!
7. Keep ALL WORK NEAT. Plan your page carefully.
8. If you get stuck discuss your thoughts and ideas with another student or teacher

Words or Phrases to Avoid!

The following words or phrases are ones which are commonly over-used or used incorrectly by students. Use the keyword sheets to find an alternative and to avoid using the words below wherever possible.

Unique	Cool
Eye-Catching	Awesome
