

Year 2 – Animals including Humans

All animals, including humans, need 3 basic things to stay alive

Air

Water

Food

To grow into healthy adults we need to eat the right foods in the right amounts.

Vocabulary	Definition
Food Chain	A sequence showing the order in which living things depend on each other for food. Starting with a plant and ending with an animal.
Shelter	What people and animals use to protect themselves from their surroundings or predators.
Habitats	Places where animals, humans and plants live suited to their needs to keep them safe.
Ocean	A habitat that some animals live in.
Rainforest	A habitat that some animals live in.

Animals, including humans, have offspring.

Lamb

offspring.
