Keeping a healthy mouth

Tooth decay	Damage to a tooth caused by plaque turning sugars into acid
--------------------	---

You can keep your mouth healthy by:

- Brushing your teeth twice a day
- Visiting the dentist regularly
- Consuming less sugary food or drinks

Food chains

Year 4 – Animals including humans

Functions of the digestive system

1. Mouth – entry point for food where saliva mixes together. Location of tongue and teeth.
2. Oesophagus – muscles contract and relax to move food to the stomach.
3. Stomach – muscles in the stomach mix the food
4. Small intestine – absorbs nutrients and passes any leftover broken down food to the large intestine
5. Large intestine – connects the small intestine to the rectum. Absorbs water from the waste food. Forms stools from waste food.
6. Rectum – Stores stool passed to it from the large intestine. Makes brain aware of need to go to the toilet
7. Anus – releases the stool. End of digestive process.

Vocabulary Dozen (14)
