# GCSE PHYSICAL EDUCATION

Paper 1 The human body and movement in physical activity and sport

Wednesday 13 May 2020 Afternoon Time allowed: 1 hour 15 minutes

## Materials

For this paper you may use:

- a calculator.

## Instructions

- Use black ink or black ball-point pen. Pencil should only be used for drawing.
- Fill in the boxes at the top of this page.
- Answer **all** questions.
- You must answer questions in the spaces provided. Do not write outside the box around each page or on blank pages.
- If you need extra space for your answer(s), use the lined pages at the end of this book. Write the question number against your answer(s).
- Do all rough work in this book. Cross through any work you do not want to be marked.

## Information

- The marks for questions are shown in brackets.
- The maximum mark for this paper is 78.
- Questions should be answered in continuous prose. You will be assessed on your ability to:
  - use good English
  - organise information clearly
  - use specialist vocabulary where appropriate.

<b>TOTAL</b>	

Answer **all** questions.Only **one** answer per question is allowed.

For each question completely fill in the circle alongside the appropriate answer.

CORRECT METHOD

WRONG METHODS

If you want to change your answer you must cross out your original answer as shown.

If you wish to return to an answer previously crossed out, ring the answer you now wish to select as shown.

**0 1**Which **one** of these bones is found at the elbow joint?**[1 mark]**

A Femur

B Fibula

C Scapula

D Ulna

---

1**0 2**Which **one** of these statements describes 'adduction' at a ball and socket joint?**[1 mark]**

A The movement of a limb away from the midline of the body

B The movement of a limb in a complete circle at a joint

C The movement of a limb towards the midline of the body

D The movement of a limb which increases the angle of a joint

---

Figure 2 shows an individual performing a push-up.

Figure 2

07.1

Using **Figure 2**, identify what type of muscle contraction is taking place in the arms during the downward phase (**A** to **B**) of the push-up.

[1 mark]

---

07.2

Using **Figure 2**, identify the main agonist in the arm during the downward phase (**A** to **B**) of the push-up.

[1 mark]

---

07.3

Using **Figure 2**, identify the lever system working at the elbow during the upward phase (**B** to **A**) of the push-up.

[1 mark]

---

07.4

Draw a fully labelled diagram in the box below to show the type of lever identified in your answer to Question **07.3**.
